Lawrenceville, GA 30043
Electronic Transmittal: Ashley.Ashe@KIKCorp.com

Subject: Label Amendment – Changes Required by the Boric Acid Interim Registration Review Decision
Product Name: Formulated Chlorinating Tablets
EPA Registration Number: 5185-482
Received Date: 11/30/2018
Decision Number: 549074

Dear Ashley Ashe:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

The Agency, in accordance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, has completed reviewing all of the information submitted with your application to support the Registration Review of the above referenced product in connection with the Boric Acid Amended Interim Registration Review Decision, and has concluded that your submission is acceptable.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6) you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 12 months from the date of this letter. After 12 months, you may only distribute or sell this product if it bears this new revised

labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the Agency. See FIFRA section 2(p)(2). If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Megan Snyderman by phone at 202-566-0639 or via email at snyderman.megan@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "Kimberly Wilson".

{All text in braces {xxx} is administrative and will not appear on a final label.}

Formulated Chlorinating Tablets

ACTIVE INGREDIENTS:	
Trichloro-s-triazinetriene	79.15%
Boron sodium oxide (B ₄ Na ₂ O ₇), pentahydrate	9.95%
OTHER INGREDIENTS:	10.90%
TOTAL INGREDIENTS	100.00%
(Available Chlorine 72%)	

KEEP OUT OF THE REACH OF CHILDREN DANGER

See [back] [side] panel for additional precautionary statements.

{In accordance with 40 CFR 156.68(d), all first aid statements, as prescribed, will appear on the front panel of the product label.}

FIRST AID: IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for treatment advice. **IF SWALLOWED:** Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. [IN CASE OF MEDICAL EMERGENCY, CALL [1-303-623-5716] [1-877-800-5553] [telephone number supplied by supplemental registrant].]

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

{Optional marketing statements that may be used when applying to residential swimming pools.}

[Provides continuous sanitation and clarification]
[Ideal product for in-ground and above ground pools]
[Easy to apply to skimmers and chlorinators]
[Kills bacteria and unsightly algae]
[For routine daily chlorination]
[For routine daily sanitation]
[Dual Active Ingredients Sanitize and Clarify]
[Multi-Function with Dual Active Ingredients]
[Enhanced Chlorinating Tablet]
[Kills Bacteria, Kills Algae, and Clarifies]
[Kills Bacteria, Prevents Algae, and Clarifies]
[Kills Bacteria, Controls Algae, and Clarifies]
[Contains Clarifiers]
[Maintains Brilliantly Clear Water]
[Multi Function Blue Tablets]
[Multiple Functions for Brilliant Water]
[Multiple Function Tablet for Above Ground Pools]
[Sunlight Protected] *{Cyanuric Acid is a known UV light stabilizer for chlorine and is intrinsic in the trichloroisocyanuric acid base molecule}*
[Sunlight Stable] *{Cyanuric Acid is a known UV light stabilizer for chlorine and is intrinsic in the trichloroisocyanuric acid base molecule}*
[Controlled Chlorination]
[Multi Purpose 3” Tablets]
[Multi Purpose Tablets]
[Contains BTDA 4200] *{name given inert ingredient}*

{Optional marketing statements that may be used when applying to commercial swimming pools.}

- [Provides continuous sanitation and clarification]
- [Multi-Function with Dual Active Ingredients]
- [Enhanced Chlorinating Tablet]
- [Kills Bacteria, Kills Algae, and Clarifies]

- [Contains BTD 4200] *{name given inert ingredient}*
- [For Use in Feeders]
- [Triple Action Formula: Sanitizes, Prevents Algae, and Clarifies]
- [Patented]
- [US Patent # 5,674,429]
- [Less Acidic than Pure Trichloroisocyanuric Acid Products]

{Following chart is optional}

Our Ingredients:	What They Do:
Trichloro-s-triazinetriene	Sanitizes, Kills Bacteria, and Prevents Algae
Boron sodium oxide (B ₄ Na ₂ O ₇)pentahydrate	Enhances Sanitizer Efficiency And Prevents Algae
BTB 4200	Continuously Clarifies And Enhances Filtration

{Directions to be used for residential swimming pool sanitization.}

SWIMMING POOL SANITIZER

When used as directed, this product's patented blend of sunlight protected chlorinating compound and filter enhancer is an effective way of maintaining brilliantly clear pool water. This unique [blue] tablet is multi – functional. It kills bacteria, destroys algae, and clarifies your pool water. This product provides the perfect solution for brilliant, clear, and inviting pool water and is ideal for both in – ground and above ground pools.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Ensure all pool equipment is working properly. If necessary, backwash or clean the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6. Add stabilizer to establish a minimum level of 20-30 PPM cyanuric acid to reduce the degrading effects of sunlight upon the chlorine residual. Superchlorinate the pool so a chlorine residual between 1 – 3 PPM is obtained. When using other products as outlined in directions for this product, always follow directions on those products.

This product contains a clarifier/flocculating agent that helps the filter system remove impurities from water via filtration. When necessary, backwash or clean the filter system following manufacturer's directions.

WHEN USED IN AUTOMATIC CHLORINATORS AND FLOATERS:

This product can be used in proportioning mechanisms such as automatic chlorinators and floaters as a maintenance treatment. Fill unit with this product and, following manufacturer's directions, adjust the feeding mechanism to assure a constant treatment level of 1 - 3 PPM available chlorine in the pool water. Use a test kit or test strips to monitor chlorine levels. Adjust the feed mechanism as needed. Check and refill the automatic chlorinator or floater as needed. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

WHEN USED IN SKIMMERS:

Initially add two tablets of this product per 10,000 gallons of water or portion thereof. (**See below) Add additional product as determined by a test kit or test strip to maintain available chlorine levels of 1 – 3 PPM. Divide number of tablets evenly for pools with multiple skimmers. This product may be used in plastic skimmers only if skimmer and the piping between skimmer and pump are plastic. Do not add other chemicals through the skimmer when using this product in skimmer as an explosion or fire may result.

** Operate pool recirculation system approximately 10 hours per day for best results. Adjusting the hours of pool recirculation or the number of tablets added to the skimmer helps to regulate the sanitizer level. The number of tablets required and frequency of addition will vary with the number of swimmers, water temperature, rain showers, and pump operating time.

Reentry into treated swimming pools is prohibited when chlorine levels are above 3 PPM due to risk of bodily injury.

DISCHARGE DIRECTIONS FOR RESIDENTIAL POOL USES - Before draining a treated pool, contact your local sanitary sewer and storm drain authorities and follow their discharge instructions. Do not discharge treated pool water to any location that flows to a gutter, storm drain or natural water body unless discharge is allowed by state and local authorities.

{Directions to be used for commercial swimming pool sanitization.}

Commercial Swimming Pool Sanitizer, Algaecide, and Clarifier

It should be used in a NSF rated commercial feeder.

When used as directed, this product's patented blend of sunlight protected chlorinating compound and filter enhancer is an effective way of maintaining clean and clear pool water. This unique tablet is multi – functional. It kills bacteria, destroys algae, and clarifies your pool water. This product provides the solution for low maintenance, and clean, clear pool water. It is ideal for commercial swimming pools.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Ensure all pool equipment is working properly. If necessary, backwash or clean the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6. When using other products as outlined in directions for this product, always follow directions on those products.

This product contains a clarifier/flocculating agent that helps the filter system remove impurities from water via filtration. When necessary, backwash or clean the filter system following manufacturer's directions.

Use this product in feeding mechanisms such as NSF rated automatic chlorinators as a primary sanitizing agent. Fill unit with this product and adjust the feeding mechanism to assure a constant treatment level of 1 – 3 PPM available chlorine in the pool water. Normally, 1-2 ounces of this product per 10,000 gallons of pool water will be needed daily. Maintain proper sanitizer levels by adjusting the automatic chlorinator valves or by using a chemical controller to monitor chlorine levels and adjust the chlorine feed mechanism as needed. Check and refill the chlorinator as needed. Do not let this product come in direct contact with bleachable surfaces as damage may occur.

The number of tablets required and frequency of addition will vary with the number of swimmers, water temperature, rain showers, and pump operating time.

Reentry into treated swimming pools is prohibited when chlorine levels are above 3 PPM due to risk of bodily injury.

DISCHARGE DIRECTIONS FOR COMMERCIAL POOL USES - Before draining a treated pool, contact your local sanitary sewer and storm drain authorities and follow their discharge instructions. Do not discharge treated pool water to any location that flows to a gutter, storm drain or natural water body unless discharge is allowed by state and local authorities.

STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Do not contaminate food or feed by storage or disposal. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Offer for recycling if available or place in trash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Highly Corrosive. Causes irreversible eye damage and skin burns. May be fatal if swallowed. Harmful if absorbed through skin. Do not get in eyes, on skin or on clothing. Wear goggles or safety glasses and use rubber gloves when handling this product. Irritating to nose and throat. Avoid breathing dust. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Do not mix with any other chemicals except water. Mix only with water. Never add water to product. Always add product to large quantities of water. When using automatic feeding devices, always follow manufacturer's directions as to the proper addition of sanitizer product to chlorinators. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire, and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

In the Directions for Use section see specific "Discharge Directions for [Commercial] [Residential] Pool Uses."

[NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.]
