

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, DC 20460

OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

August 4, 2017

Mark Jernigan
Bio-Lab, Inc.
PO Box 300002
Lawrenceville, GA 30049

Subject: Notification per PRN 98-10 – To add additional marketing statements
Product Name: BioLab T-0041
EPA Registration Number: 5185-513
Application Date: 05/04/2017
Decision Number: 529323

Dear Mr. Jernigan:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Antimicrobials Division (AD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped “Notification” and will be placed in our records.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you have any questions, you may contact Imad Merveil at 703-347-0324 or via email at merveil.imad@epa.gov.

Sincerely,

A handwritten signature in red ink that reads "Jacqueline Hardy".

Jacqueline Hardy, Product Manager 34
Regulatory Management Branch II
Antimicrobials Division (7510P)

Swimming Pool [Algaecide][Algicide] and Algae Preventative

{To maintain brand segmentation, two sets of marketing statements are provided to maintain separate brand identity. One of the following Options will be used on the label.}

{Optional Marketing Statement A}

[BioLab T-0041] [algaecide] [algicide] *{or}* [This product], when used as directed, is a highly effective, patented, non-staining [algaecide] [algicide] that kills and controls algae in swimming pools. [BioLab T-0041] [algaecide] [algicide] *{or}* [This product] is especially formulated to kill and control green, blue-green (frequently called black or spot algae) and mustard algae growths. [BioLab T-0041] [algaecide] [algicide] *{or}* [This product] **can be used as a remedy for visible algae or to prevent algae from occurring. See use directions for Prevention of Algae or Treatment of Visible Algae for proper application of [BioLab T-0041] [algaecide] [algicide] *{or}* [this product].** This product is formulated for use in chlorine or bromine sanitized swimming pools of all surface and filter types.]

{Optional Marketing Statement B}

[The BioGuard® Care System has three important parts that help you maintain crystal blue sparkling water.

- A sanitizer to kill bacteria
- A shock to destroy [organic] contaminants ***
- A preventative [algaecide][algicide] to stop algae before it starts

All parts of the BioGuard Care System are vital to achieve beautiful water.]

[BioLab T-0041] *{or}* [This product] is a non foaming swimming pool algae preventative for the BioGuard Care System. Weekly use of [BioLab T-0041] *{or}* [this product] prevents algae before it starts. [This product] *{or}* [BioLab T-0041] is formulated to complement most swimming pool sanitizers. [This product] *{or}* [BioLab T-0041] is a highly effective algae killer and algae preventative. [This product] *{or}* [BioLab T-0041] is effective and non-staining when used as directed. [This product] *{or}* [BioLab T-0041] kills and prevents all types of pool algae: black algae, green algae, and mustard algae. [This product] *{or}* [BioLab T-0041] provides a residual effectiveness that protects your pool against algae formation while keeping your pool water sparkling clear. [This product] *{or}* [BioLab T-0041] is non-foaming and can be used in pools with attached spas or jetted returns.

[***(such as [perspiration,] [sweat,] [suntan lotions,] [lotions,] [hair sprays,] [body oils,] [pee,] [urine,] [pet dander,] and [cosmetics])]

{Optional Marketing Statement C}

BioGuard's best performing [products] [pool care system] are designated as our [Platinum Series] [Tru-Blue Promise Series] [Tru-Blue Products] **[Complete Series]**. This designation means the products offer our best formulations and improved packaging to make handling and application simpler, with results that bring lasting satisfaction.

[BioLab T-0041] [this product] is a highly effective fast acting swimming pool algae destroyer. [BioLab T-0041] [this product] kills all types of pool algae: black algae, green algae, and mustard algae. [BioLab T-0041] [this product] is formulated to complement most swimming pool sanitizers. [BioLab T-0041] [this product] is effective and non-staining when used as directed. When used as directed you will see results in 24 hours. [BioLab T-0041] [this product] is non-foaming and can be used in pools with attached spas or jetted returns.

{Following text for use when packaged in bottle that includes a 4 fl. oz. over-cap over CR closure}
[This package contains a convenient 4 fl. oz. measuring cap. Rinse cap after use.]

IMPORTANT NOTES:

1. Do not use in pools sanitized with biguanides or pools treated with hydrogen peroxide.
2. Prior to the initial application of this product, test pool water for the presence of metals. If metals are present, apply a metal stain preventative per label directions.
3. When using other products, always follow label directions for those products.
4. [† In use dilution, this product is non-staining to pool surfaces and equipment.] *{or}* [† Full strength product will stain porous pool surfaces.]

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

PRIOR TO APPLICATION:

1. Ensure all equipment is working properly. If necessary, clean the filter system.
2. Adjust pH between 7.2-7.6.
3. Establish and maintain proper chlorine or bromine levels. In chlorine-treated pools, add stabilizer to establish a minimum level of 30-40 ppm of cyanuric acid to reduce the degrading effects of sunlight on chlorine residual.
4. Vacuum leaves and any other foreign debris from pool.
5. Brush visible algae thoroughly from the pool's surface with a surface-compatible brush.

TO PREVENT POOL ALGAE:

1. Initially apply 8 fluid ounces of this product per 10,000 gallons of pool water with pump and filter operating.
2. Thereafter, for weekly application intervals, add 1.5 fluid ounces per 10,000 gallons of pool water. For two week application intervals, add 3 fluid ounces per 10,000 gallons of pool water every other week. Apply more often if pool volume is diluted by heavy rain, frequent backwashing or partial drain/refill.
3. Wait at least 15 minutes after application before entering pool.

TREATMENT OF VISIBLE POOL ALGAE:

1. Apply a [BioGuard] [shock] {or} [oxidizer] per label directions.
2. Allow to circulate for 1 hour.
3. With pump and filter operating, apply 16 fluid ounces of [**BioLab T-0041**] [algaecide] [this product] per 10,000 gallons of pool water directly to the pool water in areas of heaviest algae growth.
4. Continuously circulate pool water for 24 hours.
5. The next day, thoroughly brush pool surfaces.
6. Prior to re-entry, test chlorine level. Do not enter pool until chlorine level is between 1 – 4 ppm.
7. In cases of persistent algae, repeat brushing and product application after 2-4 days.
8. [The use of a filter aid will enhance filter efficiency and algae removal.]
9. [Chemically cleaning the filter 3 to 4 days after treatment improves [results] [and] [efficacy].]

{To maintain brand segmentation, two sets of marketing statements are provided to maintain separate brand identity. One of the following Options will be used on the label.}

{Optional Marketing Statement A}

[BioLab T-0041] [algaecide] *{or}* [This product], when used as directed, is a highly effective, patented, non-staining pool algaecide that kills algae in swimming pools [and clears pool water]. [BioLab T-0041] [algaecide] *{or}* [This product] is especially formulated to kill green, blue-green (frequently called black or spot algae) and mustard algae growths. This product is formulated for use in chlorinated or brominated swimming pools of all surface and filter types.

{Optional Marketing Statement B}

BioLab T-0041 is a highly effective fast acting swimming pool algae destroyer. [This product] *{or}* [BioLab T-0041] kills all types of pool algae: black algae, green algae, and mustard algae. [This product] *{or}* [BioLab T-0041] is formulated to complement most swimming pool sanitizers. [This product] *{or}* [BioLab T-0041] is effective and non-staining when used as directed. When used as directed you will see results in 24 hours. [This product] *{or}* [BioLab T-0041] is non-foaming and can be used in pools with attached spas or jetted returns.

{Optional Marketing Statement C}

BioGuard's best performing [products] [pool care system] are designated as our [Platinum Series] [Tru-Blue Promise Series] [Tru-Blue Products] [Complete Series]. This designation means the products offer our best formulations and improved packaging to make handling and application simpler, with results that bring lasting satisfaction.

[BioLab T-0041] [this product] is a highly effective fast acting swimming pool algae destroyer. [BioLab T-0041] [this product] kills all types of pool algae: black algae, green algae, and mustard algae. [BioLab T-0041] [this product] is formulated to complement most swimming pool sanitizers. [BioLab T-0041] [this product] is effective and non-staining when used as directed. When used as directed you will see results in 24 hours. [BioLab T-0041] [this product] is non-foaming and can be used in pools with attached spas or jetted returns.

{Following text for use when packaged in bottle that includes a 4 fl. oz. over-cap over CR closure}

{This package contains a convenient 4 fl. oz. measuring cap. Rinse cap after use.}

IMPORTANT NOTES:

1. Do not use in pools sanitized with biguanides or pools treated with hydrogen peroxide.
2. Prior to the initial application of this product, test pool water for the presence of metals. If metals are present, apply stain and scale inhibitor (chelating agent) per label directions.
3. † In use dilution, this product is non-staining to pool surfaces and equipment [and clears water].

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

{Reader Note: "Prior to Application" statement Option A}

PRIOR TO APPLICATION: Ensure all equipment is working properly. If necessary, clean the filter system, adjust pH between 7.2-7.6, and establish a minimum level of 30-40 ppm of [stabilizer] [cyanuric acid] in chlorinated pools. Vacuum leaves and any other foreign debris from pool. If metals testing indicates a need to use a stain and scale inhibitor, apply that product per label directions. Brush visible algae thoroughly from the pool's surface with a surface-compatible brush. Establish and maintain proper chlorine or bromine levels.

{Reader Note: "Prior to Application" statement Option B}

PRIOR TO APPLICATION:

1. Ensure all equipment is working properly. If necessary, clean the filter system.
2. Adjust pH between 7.2-7.6.
3. Establish and maintain proper chlorine or bromine levels. In chlorine-treated pools, add stabilizer to establish a minimum level of 30-40 ppm of cyanuric acid to reduce the degrading effects of sunlight on chlorine residual.
4. Vacuum leaves and any other foreign debris from pool.
5. Brush visible algae thoroughly from the pool's surface with a surface-compatible brush.

TREATMENT OF VISIBLE POOL ALGAE:

1. Apply a [BioGuard] [shock] *{or}* [oxidizer] per label directions.
2. Allow to circulate for 1 hour.
3. With pump and filter operating, apply 16 fluid ounces of **[BioLab T-0041]** [algaecide] [this product] per 10,000 gallons of pool water directly to the pool water in areas of heaviest algae growth.
4. Continuously circulate pool water for 24 hours.
5. The next day, thoroughly brush pool surfaces.
6. Prior to re-entry, test chlorine level. Do not enter pool until chlorine level is between 1 – 4 ppm.
7. In cases of persistent algae, repeat brushing and product application after 2-4 days.
8. [The use of a filter aid will enhance filter efficiency and algae removal.]
9. [Chemically cleaning the filter 3 to 4 days after treatment improves [results] [and] [efficacy].]

{Directions to be used for pool winterization}

Winter Algae Preventative for Swimming Pools

[BioGuard® has a wide variety of products to care for your pool during the off season. These products are designated as “Off Season”.]

[**BioLab T-0041**] [winter][algaecide][algicide] *{or}* [This product], when used as directed, prevents the growth of pool algae and aids in maintaining pool water clarity during the winter when the pool is not in use. [**BioLab T-0041**] [winter][algaecide]*{or}*[The product] is formulated for use in chlorinated or brominated swimming pools of all surface and filter types.

IMPORTANT NOTES:

1. Do not use in pools sanitized with biguanides or pools treated with hydrogen peroxide.
2. †In use dilution, this product is non-staining to pool surfaces and equipment.

PRIOR TO APPLICATION: Take a sample of your pool water to your [BioGuard Dealer] *{or}* [professional pool dealer]. Follow their directions for product application(s) to properly balance your water for conditions in your area. If metals testing indicate a need to use a stain and scale inhibitor, apply that product per label directions. Allow the pool to circulate at least 1 hour before adding other products.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

1. Apply a [BioGuard] [shock] *{or}* [oxidizer] per label directions.
2. Allow to circulate 2–4 hours.
3. Then pour this product into the pool around its edges with the pool circulation system operating.
4. Add 16 fluid ounces of [**BioLab T-0041**] [winter] [algaecide] [algicide] *{or}* [this product] for each 12,000 gallons of pool water.
5. Circulate pool water for 1 hour. Then, clean filter and pool walls at water line.

In areas with severe freezing, drain pool equipment and plumbing lines or use an antifreeze recommended for swimming pool plumbing and equipment. Always follow the cleaning directions established by the manufacturer and/or pool builder. Pools with mesh covers or without covers may need to apply a [BioGuard] [shock] *{or}* [oxidizer] per label directions midwinter or just prior to freezing.

{The following is optional text to be used at BioLab's discretion with swimming pool use directions for determination of pool capacity. This information is non-essential and will be provided only as a courtesy. Will not appear on all swimming pool products.}

[TO DETERMINE POOL CAPACITY: Rectangular Pools - Length times width times average depth (in feet) times 7.5 equals gallons. Round and Oval Pools - Long diameter times short diameter times average depth (in feet) times 5.9 equals gallons.]

{Reader's note: Storage and Disposal statement for product sold for residential use:}

[STORAGE AND DISPOSAL: Do not contaminate food or feed by storage or disposal. **CONTAINER STORAGE:** Keep this product in its original tightly closed container when not in use. Store in a cool, dry, well ventilated area. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Offer for recycling if available or place in trash.]

{Reader's note: Storage and Disposal statement for product sold for commercial use:}

STORAGE AND DISPOSAL: Do not contaminate food or feed by storage or disposal. **CONTAINER STORAGE:** Keep this product in its original tightly closed container when not in use. Store in a cool, dry, well ventilated area. **PRODUCT DISPOSAL:** Pesticide wastes may be hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Offer for recycling if available or place in trash.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear protective eyewear (safety glasses or goggles) and rubber gloves. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

FIRST AID: IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF SWALLOWED:** Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. **IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice. **Have the product container or label with you when calling a poison control center or doctor or going for treatment. [IN CASE OF MEDICAL EMERGENCY, CALL [1-303-623-5716] [1-877-800-5553] [telephone number supplied by supplemental registrant].]**

PHYSICAL OR CHEMICAL HAZARDS: Do not mix with other chemicals.

{Environmental hazards statement for end-use products in containers of less than 5 gallons (liquid).}

[ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.]

{Environmental hazards statement for end-use products in containers of equal to or greater than 5 gallons (liquid).}

[ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.]

Note: [Buyer assumes all responsibility for safety and use not in accordance with directions.] [User assumes all responsibility for use not in accordance with directions.] [Metals from source water, ionizers or poorly sequestered algaecides have the potential to stain pool surfaces. Treat these problems with an appropriate stain and scale inhibitor (chelating agent) before using this product.]
