Side Panel

This product is especially formulated for use in thermal generating type fogging machines, in food processing plants such as meat packing plants, dairies, bakeries, dairy barns, flour mills, granaries, warehouses, poultry plants, bottling plants, restaurants-wherever food is processed, stored or handled. This product, when used as directed, will knock down and kill flying insects such as flies, mosquitoes, gnats, moths, as well as crawling insects such as roaches and water bugs. This product is harmless to equipment, machinery, utensils and materials and imparts no color, taste or odor to foodstuffs, food handling equipment, utensils and containers when used as directed. During spray applications, exposed foodstuffs should be covered to prevent falling insects from contaminating. Periodic and regular spraying coupled with good housekeeping procedure is essential for good insect control.

DIRECTIONS:

1. GENERAL: Follow manufacturer's directions for filling and starting thermal generating unit. Repeat applications as necessary for control.
2. FLYING INSECTS SUCH AS FLIES, MOSQUITOES, GNATS AND MOTHS. Cover all exposed foodstuffs and close all windows and doors and other openings into room to be treated. Fill entire air space with a dense fog of insecticide. The length of time necessary to do this will vary with the size of the room. This will usually be from 1 to 5 minutes. Wait 15 to 20 minutes, then open doors and windows. When fog clears, sweep up dead insects.
3. CRAWLING INSECTS SUCH AS ROACHES, WATERBUGS AND SILVERFISH: Direct fog into and onto areas frequented by these pests such as cracks and crevices, around baseboards, drain pipes and surfaces where insects crawl. Wait 15 to 20 minutes after fogging and sweep up dead insects.
4. OUTSIDE FOGGING FOR FLYING INSECTS SUCH AS FLIES, MOSQUITOES, GNATS AND MOTHS: Temporary relief from these pests can be obtained by fogging outside areas adjacent to plants. Direct fog onto trash piles, refuse storage areas, dock areas and all other areas where insects
