

Leave room closed for 15 minutes. Sweep up and destroy fallen insects. Repeat as needed. Do not remain in treated areas and ventilate the area after treatment is completed.

To Kill Flies, Gnats and Mosquitoes in Livestock Barns and Poultry Houses: Cover or remove exposed feed and watering troughs, and close house as tightly as possible. Dilute QUIKCID CONCENTRATE 1 part concentrate plus 9 parts water, and spray entire area uniformly, directing spray toward ceilings and windows. Leave barn closed 10 - 30 minutes, then ventilate prior to entry. Repeat application as necessary.

Roaches and Waterbugs: Dilute one part concentrate with nine parts water or spray base and spray to point of run off into all cracks, crevices, underneath sinks, behind pipes, around base of all machinery, paying particular attention to dark areas in which roaches might hide or nest. Contact as many insects as possible while spraying. Repeat as necessary.

Fleas (Infesting Premises): Dilute one part concentrate with 15 parts water or spray base. Remove and destroy animals' bedding, and spray sleeping quarters liberally, forcing spray into all cracks in the floor and about the room. Repeat when necessary.

Carpet Beetles: Dilute one part concentrate with nine parts water or spray base. Spray liberally infested areas, paying particular attention to cracks, crevices and other hiding places. Spray liberally the undersides of carpets. Repeat when needed.

Granary Insects, Such as Accessible Stages of Weevils, Flour Meal Moth Larvae and Adults, Cadelle and Saw-Toothed Grain Beetles: Dilute one part concentrate plus nine parts water or spray base. To control crawlers, apply to point of run off to all areas infested by these insects. Pay particular attention to cracks and crevices in floors, walls and ceilings. Spray thoroughly around and into floor drains, conveyors and other areas where granary insects may be found. (For flying moths, treat as for flies and other flying insects. See above.)

Bushes and Other Plants: Dilute with 15 parts of water to one part of concentrate. To control mosquitoes, spray a mist over and under bushes in the evening when insects tend to light. Do not use spray base for application on plants.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Point valve opening away from face and push button holding upright.

FOR FLYING INSECTS: (Flies, mosquitoes, gnats, wasps). Spray toward ceiling and center of room to fill area with mist. For best results close doors and windows and leave room for fifteen minutes. Repeat as needed. Cover utensils, food and dishes before spraying. Do not remain in treated areas and ventilate the area after treatment is completed.
