DIRECTIONS FOR USE

bioMet 650 Germicidal Detergent Concentrate is recommended for use in manual disinfection and cleaning of all floor areas in hospitals, hotels, motels and other institutions. It is recommended for use on rubber, asphalt and vinyl floors. This concentrate should be used at a dilution of 1:128 by volume. Add one ounce of bioMet 650 to each gallon of water and mix well. Added to water, bioMet 650 is rapidly miscible and can be used almost immediately. It is also free-rinsing. Use with a mop and bucket procedure; thoroughly wetting the floor surface to provide maximum effectiveness.

bioMet* 650 Germicidal Detergent Concentrate is a new and unique liquid concentrate which provides excellent cleaning ability, as well as effective control of a broad spectrum of bacteria.

When used according to directions, bioMet 650 effectively kills many infectious organisms including Staphylococcus aureus, Pseudomonas aeruginosa, Salmonella choleraesuis, Trichophyton interdigitale, and Mycobacterium tuberculosis.
