Lakeshore P.C. 41 18-5-9 TURF FERTILIZER WITH BALAN™

LAKESHORE'S 18-5-9 TURF FERTILIZER with BALAN™ is a combination of a quality fertilizer and a selective pre-emergence herbicide which controls smooth and hairy crabgrass, annual blue grass (poa annua), green and yellow foxtail, barnyard grass, and goosegrass (silver crabgrass or crowfoot) by destroying the infant plants as the seeds germinate. It does not control established weeds.

LAKESHORE'S 18-5-9 TURF FERTILIZER with BALAN™ can be applied to established turf grasses of bluegrass, ryegrass, fescue, soyala and bermuda and will not result in any injury to the turf when applied in accordance with the directions. Do not apply to bent grass, discolors or newly planted areas of bermuda, St. Augustine or centipede grasses. Do not apply to any lawn seeded the previous fall season.

DIRECTIONS FOR USE

For crabgrass control only: Apply 230 pounds per acre or one 60 lb (50) pound bag to 10,000 square feet (100 x 100) of turf area during the spring of the year prior to the germination of crabgrass. At this rate of application one ton of LAKESHORE'S 18-5-9 TURF FERTILIZER with BALAN™ will cover 0.1 acres which supplies a minimum of 2.0 pounds of Technical Balan per acre and approximately one (1) pound of nitrogen per 1,000 square feet. Do not reseed the treated area for six (6) weeks after application.

For poa annua control: Apply at the rate of 275 pounds per acre or one 60 lb (50) pound bag to 8,000 square feet (80 x 100) of turf area during the early spring (prior to May 15) or during the summer period of July 15th - August 15th. At this rate of application one ton of LAKESHORE'S 18-5-9 TURF FERTILIZER with BALAN™ will cover 7.5 acres which supplies a minimum of 2.0 pounds of Technical Balan per acre and 1.15 pounds of nitrogen per 1,000 square feet. Do not reseed the treated area for 12 to 16 weeks after application.

In order to secure the desired results, it is suggested that the product be applied evenly to the turf area at the recommended rate. Avoid excessive or inadequate application. The product has a bulk density of approximately sixty (60) pounds per cubic foot.

CAUTION

May be harmful if swallowed. Avoid contact with skin or eyes. Avoid breathing dust. Avoid contamination of feedstuffs or feeds. Wash thoroughly with soap and water after using.

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not contact safe water by cleaning of equipment or disposal of wastes.

DO NOT REUSE CONTAINERS. DESTROY WHEN EMPTY

TURF FERTILIZER WITH BALAN™

LAKESHORE'S 18-5-9 TURF FERTILIZER with BALAN™ is a combination of a quality fertilizer and a selective pre-emergence herbicide which controls smooth and hairy crabgrass, annual blue grass (poa annua), green and yellow foxtail, barnyard grass, and goosegrass (silver crabgrass or crowfoot) by destroying the infant plants as the seeds germinate. It does not control established weeds.

LAKESHORE'S 18-5-9 TURF FERTILIZER with BALAN™ can be applied to established turf grasses of bluegrass, ryegrass, fescue, soyala and bermuda and will not result in any injury to the turf when applied in accordance with the directions. Do not apply to bent grass, dicentra or newly planted areas of bermuda, St. Augustine or centipede grasses. Do not apply to any lawn seeded the previous fall season.

DIRECTIONS FOR USE

For crabgrass control only: Apply 220 pounds per acre or one fifty (50) pound bag to 10,000 square feet (100 x 100) of turf area during the spring of the year prior to the germination of crabgrass. At this rate of application one ton of LAKESHORE'S 18-5-9 TURF FERTILIZER with BALAN™ will cover 9.1 acres which supplies a minimum of 1.5 pounds of Technical Balan per acre and approximately one (1) pound of nitrogen per 1,000 square feet. Do not reseed the treated area for six (6) weeks after application.

For poa annua control: Apply at the rate of 275 pounds per acre or one fifty (50) pound bag to 8,000 square feet (80 x 100) of turf area during the early spring (prior to May 15) or during the summer period of July 15th-August 15th. At this rate of application one ton of LAKESHORE'S 18-5-9 TURF FERTILIZER with BALAN™ will cover 7.3 acres which supplies a minimum of 2.9 pounds of Technical Balan per acre and 1.13 pounds of nitrogen per 1,000 square feet. Do not reseed the treated area for 12 to 14 weeks after application.

In order to secure the desired results, it is suggested that the product be applied evenly to the turf area at the recommended rate. Avoid excessive or inadequate application. The product has a bulk density of approximately sixty (60) pounds per cubic foot.

CAUTION

May be harmful if swallowed. Avoid contact with skin or eyes. Avoid breathing dust. Avoid contamination of feedstuffs or foods. Wash thoroughly with soap and water after using.

This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.
