HOW TO USE NOX-GERM

Items or materials to be treated should be completely wrapped in NOX-GERM paper. Sealing of seams is not required, but will help retain NOX-GERM's potency as well as to prevent entrance of dust or foreign matter. Intimate contact between NOX-GERM and the packaged item or material is not necessary since the volatile ingredients will diffuse throughout the package.

NOX-GERM should be used immediately after removal from its wrapping.

Good results are obtained when contaminated articles have been wrapped with NOX-GERM paper for as little as two hours.

STORE NOX-GERM IN COOL, DRY PLACE, KEEP PACKAGE CLOSED WHEN NOT IN USE.
