

# S-T-D

(Protected by U.S. Pat. 2,473,984)

For use without dilution as a soil fumigant for the control of subterranean termites by application beneath concrete slabs, such as porches, and where it may be impractical to prepare structural or chemical barriers.

## INGREDIENTS

Active Ingredients ..... 100%

Petroleum Hydrocarbon  
Ethylene Dibromide  
Technical Chlordane\*

\*Consists of octachloro-4,7-naphtho-tetrahydrodioxin and related compounds.

## DIRECTIONS

S-T-D should be applied beneath concrete slabs through holes drilled adjacent to wall and pier foundations, under cold joint failures or where cracks permit entry of insects. Holes should be drilled through the slab at points no further apart than 5 feet and S-T-D applied through these holes to a point 12-18 inches beneath the surface. At 5 ft. spacings apply 3 pints of S-T-D per hole, at 2½ ft. spacings apply 2 pints per hole. The drilled holes should be sealed with cement as quickly as possible after applying the fumigant. Wherever termites' emergence tubes can be located they should be given direct treatment by digging down to a depth of at least 12 inches and applying a half gallon of S-T-D at this point then filling the hole again and packing the soil down firmly. For best results the actual tube structure should be wetted.

NOTE: S-T-D is designed for use only where it can be confined as a fumigant. It should never be used as a spray for use on wood or the ground.

## CAUTION:

### KEEP OUT OF REACH OF CHILDREN

Avoid breathing vapor. Do not get in eyes, on skin or on clothing. In case of contact, immediately remove clothing, including shoes, and flush skin or eyes with plenty of water for at least 15 minutes; for eyes, get medical attention. Wash clothing and air shoes thoroughly before re-use. Do not take internally. Use only with adequate ventilation. In confined spaces the operator should wear a gas mask equipped with an organic vapors cartridge. Harmful if swallowed. Contact with skin can cause toxic symptoms. **FLAMMABLE**—Keep away from heat and open flame.

If illness results from inhalation, remove to fresh air and call a doctor.

If swallowed, call a doctor. Induce vomiting by giving an emetic such as a tablespoonful of table salt in a glass of warm water. Seller makes no warranty of any kind, express or implied, concerning the use of this product. Buyer assumes all risk of use or handling, whether in accordance with directions or not.
