5-28-70
UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND MITICIDE ACT
FOR GC NUMBER PLUS IN REGISTER
EFFECTIVE NO. 5330-3

Comments

DIRECTIONS
To be most effective the Dust should be applied before insects become numerous and before diseases are apparent. Protect plants thru the growing season by dusting at 7 to 14 day intervals, but do not use in excess. Apply more frequently (every 4 to 5 days) during periods of rapid new growth and especially during wet humid spells when disease infection is most likely to be severe. Pay particular attention to cover the underside of leaves as well as the top of the leaf.

PARTIAL LIST OF INSECTS CONTROLLED
Aphids, Clover Mites, Red Spider Mites, Japanese Beetles, Rose Chafer, Rose Leaf-hoppers, Leaf Rollers, Rose Slugs, Flea Beetles, Thrips, Tarnished Plant Bugs, Four Lined Leaf Bugs, Whitefly, Asiatic Garden Beetles and Black Blister on
