## DIRECTIONS FOR USE

# FOR EXTERIOR USE ONLY

Note: It is a violation of federal law to use this product in a manner inconsistent with its labeling. This product is not recommended for use on primed or previously painted surfaces. Do not use on wood that will be in contact with food, feed or potable water. Do not use this product where any portion of the treated wood will be below ground. Do not apply when surface or atmospheric temperatures are less than 50° F.

USE FOR: This product can be used for all above ground applications., It may also be used as a booster or adjunct to pressure-treated wood where the wood is to be used on the ground's surface (e.g., ornamental or landscape timbers). This product is recommended for shingles (not asbestos), shakes, porches, railings, structural support timbers, flatbeds, cold frames, fences, decks, patios, miliwork, joinery, and smooth or rough siding.

SURFACE PREPARATION: All surfaces must be dry, well cured and cleaned of dust, dirt, oil, wax or any other contaminants that might affect adhesion or performance. Remove mildew by scrubbing with a 50% dilution of household bleach followed by water. Wear protective glasses and rubber gloves to avoid eye and skin irritation. Make sure all surfaces are dry.

APPLICATION: Stir well before using, no thinning is required. Wood should be dry, unpainted, well seasoned and bark free. Cut, machine, and sand wood prior to treatment if possible. If not, liberally apply two coatings of preservative to all joints, cracks, cut-ends, holes, or other openings. If COATING, apply with a brush, sprayer, or roller. For best protection, two coats should be applied. Apply second coat when first coat is dry to the touch. Recoat after 12 hours minimum. Applying paints and stains often results in splashing or dripping. Cover desirable paints and shrubs to protect against possible injury.

For DIP treatment, lumber should be totally immersed to insure all surfaces are treated. A three to six minute immersion is preferable depending on lumber size. Do not undertreat. Keep the dip solution clean from debris, sawdust, or rainwater. Freshly treated wood must be protected from rain to prevent dilution and wash off of the GWP-1 treatment. For sapstain control on unseasoned wood, use 3 parts GWP-1 to 2 parts clean tap water. For severe fungal problems, use GWP-1 undiluted. Freshly cut wood should be treated within 24 hours to prevent fungal attack from extending below the wood's surface beyond treatment. Add part of the water to the dip tank before adding the GWP-1; then add the remaining water required to achieve the dilution ratio. Rinse the GWP-1 container and add rinsate to the dilution. Stir or agitate during the entire mixing process. Contact Troy Chemical Corporation for specific recommendations on handling of treated wood.

COVERAGE: Depending upon method of application and porosity, texture and dryness of wood: 200-400 square feet per gallon.

**EQUIPMENT CLEANING:** Use a solvent such as Mineral Spirits to remove wet wood preservative from all surfaces, brushes, sprayers, and rollers.

POST-TREATMENTS: If staining or painting are to be done, allow treated surfaces to dry thoroughly before applying finish. Either latex or oil based paint or stain may be used.

**RE-APPLICATION**: For best results and uniformity of appearance, re-treat at least once every three years.

revised 6/27/94

## STORAGE AND DISPOSAL

STORAGE: Do not store near excessive heat. Keep closures tight and upright to prevent leakage. In case of spills: Soak up spills or leaks with sand, dirt, or synthetic absorbent, and put into a container for disposal.

#### **HOMEOWNER USE**

Do not reuse empty container. Securely wrap original container in several layers of newspaper and discard in trash.

## COMMERCIAL USE

PESTICIDE DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by other procedures approved by State and local authorities.

#### IMPORTANT NOTICE TO BUYER:

Neither the manufacturer nor the seller make any representation of warranty, expressed or implied, concerning this material, other than indicated on the label. Neither shall be held responsible in any manner for any personal injury, property damage, or other type of loss resulting from improper handling, storage and use of this material.
