DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

TROY MERGAL K9N is a microbicide that is effective against bacteria, yeasts, molds and algae. It is used as an industrial microbicide for adhesives, building materials, pigment dispersions, emulsions, paints and coatings.

TROY MERGAL K9N is used to control bacteria and fungi in dispersed pigments such as kaolin clay, montmorillonite clay, titanium dioxide, calcium carbonate, calcium sulfate, barium sulfate, and magnesium silicate used in paint and paper production. Typical emulsions include printing components (inks, resins, waxes, and surfactants). Building materials include mastics, caulks, joint cements, spackling, plasters and stuccos. Used as an in-can preservative in paints and coatings.

It is best if TROY MERGAL K9N is added to the initial phase of production; however, if excessive temperatures or pH values can occur addition at the end of the manufacturing process is recommended.

Typical usage rates are 0.05 - 0.40% based on the total weight of the formulation.

Do not apply this product in a way that will contact workers or other persons.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

STORAGE: Storage between 90°F (32°C) and 32°F (0°C) is recommended.

DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.
