

DIRECTIONS

1. Thoroughly scrape or rinse off all loose food soils.
2. Thoroughly wash with a suitable detergent, being certain that crevices are thoroughly cleaned.
3. Rinse with clean hot water until all soil and detergent are removed.
4. Immerse in the correct sanitizing solution as shown by the Dilution Table for a period of at least two minutes.
5. Note: Most health and dairy sanitarians recommend a dilution of 100 ppm of the type of organic chlorine compound contained in these tablets. For this solution, use one (1) tablet in 2 gallons of water. Any solution that is used on food handling or processing equipment must be rinsed with safe or potable water before being placed back into use.
6. If sanitizing solution falls below 50 ppm of available chlorine as determined by a test kit, prepare fresh correct solution.
7. Allow utensils and equipment to air dry.

CHLORO TABLETS comply with Appendix F of the 1965 Milk Ordinance Code of the U. S. Public Health Service.

CHLORO TABLETS
Chlorine Sanitizing Agent

For use in dairy bars, restaurants, and food handling establishments.

Active Ingredients:
Sodium Dichloro-s-Triazinetrione.....10.0%
*Sodium Dodecyl Benzene Sulphonate.... 1.5%

Inert Ingredients.....88.5%

TOTAL.....100.0%

*Linear Type - Biodegradable.

CAUTION

Keep out of reach of children

Read precautions on side panel.

50 Tablets

Net Weight 1 lb. 5 oz.

"DO NOT REUSE CONTAINER...DESTROY WHEN EMPTY"

DILUTION TABLE

No. of Tablets	Amount of Water	ppm of Available Chlorine
1/2	2 gals.	50
1	2 gals.	100

NOTE: See rinse requirement in Direction #5 for solutions above 100 ppm.

Additional Usages: CHLORO TABLETS provide excellent solutions for sanitizing and deodorizing a variety of equipment in dairies, bottling plants, and food handling establishments.

CAUTION: HARMFUL IF SWALLOWED. Avoid contact with eyes and other sensitive skin areas. In case of contact, flush copiously with water. If swallowed, feed milk. Get medical attention.

Avoid contamination of food products. Do not use in combination with soap, detergent, or other chemicals. Do not mix with ammonia.
