INSECTICIDE

DESCRIPTION: This insecticide is a white powder which is soluble in water. It is effective against a wide range of insects including flies, mosquitoes, and houseflies. It is used for the control of these insects in homes, schools, and public buildings.

DIRECTIONS FOR USE

1. Mix 1/2 ounce of this insecticide with 1 gallon of water. 2. Spray the solution on the surfaces to be treated. 3. Repeat the application every 7 to 10 days. 4. Do not use on food or food containers. 5. Avoid contact with eyes and skin. 6. Store in a cool, dry place.

WARNING

COMBUSTIBLE
