5426-1

DIRECTIONS

Mix 1 tablespoon of Clover Kill with 1 gallon of water. Spray Clover very light, as very little does the job. (Over spraying only gives more browning and damage to the turf.) Make application on sunny, dry day. Do not water the lawn for 24 hours after application. Wash sprayer and spoons after use, plus hands and face.

PLEASE NOTE

In 2 or 3 days give your lawn a Nitrogen Fertilizer. This will clear up the slight browning caused from Spraying.
