SPACE SPRAYING:

DIRECTIONS FOR INDUSTRIAL AND INSTITUTIONAL USES

Atomize with Atomizer or Cardinal Electric Sprayer to kill Flying Insects, such as Flies, Mosquitoes and other insects. Atomize one pint of PACKINGHOUSE FOGGING SPRAY per 10,000 cubic feet of space.

To kill accessible Crawling Insects, such as Cockroaches (Waterbugs), Crickets and similar insects, use one quart of PACKINGHOUSE FOGGING SPRAY per 10,000 cubic feet of space.

Keep doors and windows closed in order to obtain maximum results. Premises should be closed for at least ten minutes after spraying.

CONTACT SPRAYING:

For Flour and Grain Beetles, Grain weevils, Flour and Meal Moths, spray with a hand sprayer or backpack sprayer. Spray Gun. Clean out bins, elevator boots, elevator spouts, and machines of all flour and grain. Then spray PACKINGHOUSE FOGGING SPRAY on all surfaces, in cracks and hiding places, to kill the insects and stages of insects. This procedure should be repeated as often as necessary.

To kill Roaches (Waterbugs), Silverfish and similar insects and Spiders in premises, direct spray directly toward infested areas and directly on the insects. Thorough application of spray should be made by spraying walls, floors, doors, room corners, garbage receptacles, etc. Repeat treatment as often as necessary.

CAUTION:

Use this product as a space spray in food processing plants only. Do not use in home spraying. If used in home, remove or cover food and all processing surfaces should be covered with plastic. Do not use in home. Do not apply to animals. Do not spray or store near heat or open flame.
