CARBAYTEX INSECTICIDE

EPA REG. No. 5440-93

Contains: Baytex-Fenthion

5440-93

ACTIVE INGREDIENTS	100.00%
Petroleum Distillate	98.65%
Fenthion O,O-Dimethyl-(6-(4-methylbenzyl)-4-methyl-phosphorothioate)*	1.00%
Technical Piperonyl Butoxide**	.25%
Pyrethrins	.10%

* Baytex is a registered trademark in the U.S. and Canadian patent offices by Farbenfabriken Bayer, A.G., Chemagro Corp. Licensee, U.S. Patent No. 3,042,703

** Equivalent to .20% (Butylcarbitol) (6-Propylpiperonyl) Ether and .05% Related Compound

~~DO NOT SPRAY ON FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS.~~ Places other than private residences in which food is handled, prepared and/or stored. Includes receiving, levelling, storage(dry, cold, frozen, raw), packaging(loading, bottling, wrapping, boxing), preparing, cleaning, storing, office waste storage, food processing systems (e.g., flour, sugar, edible oils, syrups).

~~DO NOT SPRAY AND CREVICE TREATMENT ONLY.~~ Apply material as a powder or aerosol spray directly into cracks and crevices, expansion joints or where different elements of construction or between equipment bases and floor, wall, ceiling or floor equipment legs - where Cockroaches, Crickets, Ants, Spiders and Silverfish may hide. (When necessary to treat electrical distribution facilities and equipment, such as junction or switch boxes, motor housings - for effective control of the above insect pests, treat with Carbaytex Insecticide. Prior to treatment de energize all units and do not re energize until the material has thoroughly dried to minimize the danger of ignition of the material by sparks produced during operation of the equipment.) This material may also be used as an aid in controlling the following pantry pests which may come in contact with the material: Sawtooth Grain Beetle, Confused Flour Beetle, Rice Weevil, Corn Rootworm, Drugstore Beetle and Indian Meal Moth. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces. Thoroughly wash all food processing surfaces that may have become contaminated during treatment with soap and water prior to use.

~~DO NOT SPRAY IN THE FOOD AREA~~ ~~DO NOT SPRAY IN FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT, AND FLOOR AREA~~

~~DO NOT SPRAY IN NON-FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS~~ includes garbage rooms, elevator shafts, floor drains, laundry rooms and vestibules, offices, locker rooms, break rooms, rest rooms, garages, mop closets, and storage after canning or pasteurization. Spray as a coarse spray or dust. Use a stiff brush to baseboard corners, under water valves, surfaces behind and beneath fixtures, tables, chairs and shelving, and through cracks or holes in walls.

CAUTION: KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED.

Inhalation: Material may be harmful if inhaled. May be harmful if swallowed or absorbed through the skin. In case of inhalation, move to fresh air. If skin irritation occurs, wash immediately. If eye irritation occurs before or after use, do not use this product to treat food processing surfaces. Apply so that no contamination of food or food handling surfaces will occur. Avoid excessive settling of asphalt-like materials on plastic materials. DO NOT SPILL on the household.

The product is toxic to fish and wildlife. Birds feeding on treated areas will be killed. Do not allow body of water to contaminate water by cleaning of equipment, or disposal of wastes. Do not spray directly onto fish. Return to a "conditioned" area by backfilling or crushing and burying in a safe place.
