*Piperonyl butoxide, technical.....	500%
/N-actyl bicycloheptene dicarboximide.....	825%
Petroleum distillate.....	98.425%

*Consists of .400% (butylcarbityl)(6-propylpiperonyl) ether and .100% other related compounds.
/MGX 264, Insecticide Synergist.

DIRECTIONS FOR USE

Space Spray to Kill Flies, Mosquitos, Small Flying Moths and Gnats: Close room and shut off all air conditioning or ventilating equipment. Apply with mechanical or compressed air sprayer or with fogger which gives small particle size. Direct spray upwards towards upper corners of room and ceiling. Apply at the rate of 0.5 to 1.0 fluid ounce per 1000 cu. ft. of space to be treated. Leave room closed for one half hour. Ventilate room thoroughly before re-entry. Repeat as necessary for insect control.

Contact or Surface Spray to Kill Roaches, Waterbugs and Ants: Apply with a sprayer that gives large wetting droplets. Force spray into cracks and crevices in walls and floors, areas at base of machinery, behind cabinets, around pipes and openings, along baseboards and other insect harborages. Use one gallon of spray per 1000 cu. ft. of surface to be treated. For ants, spray trails and all points of entry into the building. Spray ant nests directly with the spray. Repeat applications as necessary for control.

CAUTION:

Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation.

Do not re-use empty container. Perforate or crush and bury in a safe place away from water supplies.
