

ALCO STUMP KILLER

Alco Stump Killer is  
Non-flammable - Non-volatile.

CAUTION: KEEP OUT OF REACH OF CHILDREN.  
SEE BACK PANEL FOR ADDITIONAL CAUTIONS.

Alco Stump Killer provides an easy, chemical way of removing tree stumps  
without the necessity of digging and chopping.

ACTIVE INGREDIENT	% By Weight
Ammonium Sulfamate	95%
INERT INGREDIENTS	5%
	<hr/> 100%

USE ONLY AS DIRECTED.

READ ENTIRE LABEL BEFORE USING.

DIRECTIONS FOR USE: Alco Stump Killer can be used either in the crystal form  
or in a paste thick solution.

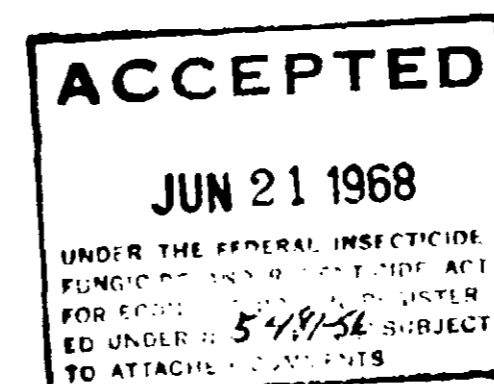

Best results are obtained on stumps 2 inches or more in diameter.  
Application should be made as soon after cutting as possible.

To use the paste solution add enough water to the contents of this container  
using a small bucket or other container to make a rather thick paste. This  
should be applied by brush or paddle to the entire cut surface of the stump.

To use the crystals -- apply just as they come from the container to the  
freshly cut surface of the stump, being sure thorough coverage is made of the  
cut area.

For faster results the crystals can be applied in the following manner:  
For stumps up to 12 inches in diameter drill a one inch diameter hole down the  
center of the stump from the top. This hole should be at least 10 inches deep.  
Then five to six inches down the side of the stump drill another one inch  
diameter hole on an angle so that it will intersect with the bottom of the  
vertical hole.

Pour at least four ounces of Alco Stump Killer into each hole. Fill both holes  
with water and let stand.

For stumps larger than 12 inches in diameter two to four or more sets of holes may be needed. Treat these holes the same as described above.

Alco Stump Killer hastens the decomposition of the stump. The stump becomes porous, thereby enabling easy removal or allowing for easy burning. If the stump is burned, treat thoroughly with kerosene, then ignite. The stump will burn with a slow smoldering action.

Depending on the variety of tree, the stump will breakdown sufficiently for easy removal in four to twelve weeks.

CAUTION: Avoid prolonged contact of skin with strong solution of this material. In case of contact wash off with plenty of water. Avoid getting in eyes.

Alco Stump Killer is non-selective in its action so care should be exercised to keep it off desirable plants.
