

**READ ENTIRE LABEL BEFORE USING
USE ONLY AS DIRECTED**

DIRECTIONS FOR USE:

Alco Sta-Gon Insecticidal Dust is designed for the control of roaches, ants and silverfish which inhabit the dark inaccessible areas of public buildings, restaurants and homes. When judiciously applied into the cracks and crevices which traditionally harbor cockroaches it will afford extended protection against this universally unaccepted insect.

Alco Sta-Gon Insecticidal Dust acts slowly but continuously and when properly applied should kill the roach population within 7 to 10 days. Furthermore, because it is non-volatile, Alco Sta-Gon Insecticidal Dust will remain active and effective for extended periods of time.

COMMERCIAL AND METROPOLITAN USE: Use power duster to apply Alco Sta-Gon Insecticidal Dust to large voids such as beneath manholes at the rate of 1 to 2 pounds per manhole opening. One application is usually sufficient for extended periods of time providing dust is not washed away.

HOME USE: Open spout of squeeze bottle and blow dust into building voids, soffits, under and behind refrigerators and stoves, under tubs, into openings around drains, water pipes and electrical conduits. Remove lower cabinet bottom drawers and dust onto sub-flooring. Also treat intersections and corners of shelves in cabinets, cupboards, pantries and closets. Apply only in areas inaccessible to children and pets.

ATTIC AND SUB-FLOOR VOIDS: Blow dust, using a power duster, into attic and sub-floor areas such as crawl spaces to prevent infestation from roaches, ants and silverfish. Alco Sta-Gon Insecticidal Dust has electrostatic properties that help it adhere to most surfaces. Enough Alco Sta-Gon Insecticidal Dust should be used to visibly coat all surfaces where protection is desired. Use 1 pound per 1,000 square feet of surface.

APPLICATIONS WITHIN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS:

FOOD HANDLING ESTABLISHMENTS—Places other than private residences in which exposed food is held, processed, prepared or served.

FOOD AREAS — APPLICATION LIMITED TO CRACK AND CREVICE TREATMENT ONLY.

Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing) preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas (when food is exposed and facility is in operation also would be considered a food area).

Apply a small amount of material directly into cracks and crevices, such as expansion joints between different elements of construction, or between equipment bases and the floor, wall voids, or hollow equipment legs where roaches hide. Use the squeeze bottle to apply this material in cracks and crevices. Care should be taken to avoid depositing the product on the exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT, ARE NOT PERMITTED.

Do not contaminate water. Apply this product only as specified on this label.

CONTAINER DISPOSAL: Rinse equipment and containers and dispose of wastes by burying in non-crop lands away from water supplies. Containers should be disposed of by punching holes in them and burying with wastes, or by burning. (Keep out of smoke.)

NOTICE: Neither Manufacturer nor Seller shall be liable for any injury or damage suffered by reason of the use of this product for a purpose not indicated by the label, or contrary to the directions, nor for breach of any warranty not expressly specified. Buyer accepts material subject to these terms, and assumes all risk of use, storage or handling of this material not in strict accordance with the directions. Neither Manufacturer nor Seller makes any representations or warranties, expressed or implied, not specifically set forth herein.
