Subject: Label Amendment
DDVP Technical Grade
EPA Reg. No. 5481-96
Your e-mail and draft label submitted March 8, 2007.

Dear Mr. Woods:

The amendment referred to above, submitted in connection with registration under Section (3) (c) (7) (a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended is acceptable subject to the comments and terms for conditional registration listed below. Two (2) copies of the finished labeling must be submitted prior to releasing the product for shipment. A stamped copy of the label is enclosed for your records.

1. You will submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3 (c) (5) when the Agency requires all registrants or similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.
2. You agree that the subject amendment is conditional under the same terms and conditions as stipulated in the May 9, 2006 letter (Ref. Wintermute to Rossi).
3. You will make the following label changes:
 - a. On page 4 under Aerosol Spray Can – Not Total Release add the following precaution: “Do not apply more frequently than once a month.
 - b. On page 5, 6 and 9 delete “Backpack” from the statement Not for Use with Hand Held Backpack foggers...etc.
 - c. On pg 2 add the following phrase to the end of the respirator statement:

2/10

“approval number prefix TC-14 G, or a NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any R, P or HE prefilter.

- d. Under Aerosol/Fogger Formulations and Liquid Formulation Indoors delete the statements “Do not use in any areas where infants, or the sick.....etc.” As we discussed previously this statement as written is not enforceable unless we identify an extended period of confinement is.
- e. Under the warranty statement, add “To the extent consistent with applicable law” to the statement beginning “The manufacturer neither makes nor intends, nor does it authorize.....etc”. Also change “To the fullest extent permitted by law “ to “To the extent consistent with applicable law”.

Please note that a notice of availability of EPA’s Interim reregistration eligibility document (IRED) for products containing dichlorvos was published in the FR on June 30, 2006 (Vol 71 No 126 page 37568). Additional data and/or labeling changes may be required for products containing permethrin.

If you have any questions in regard to this letter please feel free to contact me at 703-305-6100.

Sincerely,

NOTE TO PHYSICIAN

Symptoms include weakness, headache, tightness in chest, blurred vision, non-reactive pinpoint pupils, salivation, sweating, nausea, vomiting, diarrhea, and abdominal cramps.

TREATMENT: Atropine is the specific therapeutic antagonist of choice against parasympathetic nervous stimulation. If there are signs of parasympathetic stimulation, *Atropine sulfate* should be injected at 10-minute intervals in doses of 1 to 2 milligrams until complete atropinization has occurred. *Pralidoxime chloride (2-PAM)* may also be used as an effective antidote in addition to and while maintaining full atropinization. In adults, an initial dose of 1 gram of 2-PAM should be injected, preferably as an infusion in 250 cc of saline over a 15 to 30 minute period. If this is not practical, 2-PAM may be administered slowly by intravenous injection as a 5 percent solution in water over not less than two minutes. After about an hour, a second dose of 1 gram of 2-PAM will be indicated if muscle weakness has not been relieved. For infants and children the dose of 2-PAM is 0.25 gram. Morphine is an improper treatment. Clear chest by postural drainage. Oxygen administration may be necessary. Observe patient continuously for 48 hours. Repeated exposure to cholinesterase inhibitors may without warning cause prolonged susceptibility to very small doses of any cholinesterase inhibitor. Allow no further exposure until cholinesterase regeneration has been attained as determined by blood test.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Fatal if absorbed through the skin. Rapidly absorbed through skin. May be fatal if swallowed or inhaled. Do not breathe vapors. Repeated inhalation or skin contact may without symptoms, progressively increase the susceptibility to Dichlorvos (DDVP) poisoning. Causes moderate eye irritation. Avoid contact with eyes. Do not get on skin or on clothing. Do not contaminate food or feed products.

REQUIRED PROTECTIVE CLOTHING

Persons who handle this product must wear the following protective clothing:
