DIRECTIONS FOR USE

For best results, thoroughly water area to be treated 12 to 24 hours prior to application. Sprinkle 1 pound of granules uniformly over 1,000 square feet of area. Do not place granules in piles. Scatter bait so it is hardly visible on the ground. When making applications, special attention should be given to treating areas around plant beds, under greenhouse benches, on dichondra and around building foundations. On small or narrow beds, apply material on bed perimeters. Evening application gives most effective control. The effective life of the granules can be increased if watering is avoided for as long as possible after application. Repeat applications as necessary to keep areas free of slugs and snails. Do not use on plants grown for food.

CAUTION

May be harmful if swallowed, inhaled, or absorbed through skin. Do not get in eyes, on skin, or on clothing. Wash thoroughly with soap and warm water after handling. Wash contaminated clothing with soap and hot water before re-use.

Do not contaminate feed or food. Keep out of reach of children and pets.

If poisoning occurs, obtain prompt medical aid.

ANTIDOTE: Atropine sulfate.

Do not reuse empty container. Destroy by burying with waste or burning. Stay away from smoke and fumes.

This product is toxic to fish and wildlife. Keep out of lakes, streams or ponds. Birds feeding on treated areas may be killed. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.
