DIRECTIONS FOR USE (Cont.)

WHERE TO USE

FOR USE AS A SOIL TREATMENT AROUND THE HOME FOUNDATION  
IN DICHONDRA and TURFGRASS AREAS - FLOWER GARDENS  
GROUND COVERS - ORNAMENTAL GREENHOUSES - ORNAMENTAL PLANTINGS

For best SNAIL, SLUG, SOWBUG and MILLIPEDE control, thoroughly water areas to be treated 12 to 24 hours prior to application. Sprinkle 1 pound of granules uniformly over 1,000 Sq.Ft. of area. (44 lbs. per acre). Do not place granules in piles. Scatter bait so it is hardly visible on the ground. When making applications special attention should be given to treating areas around plant beds; under greenhouse benches; on dichondra and around building foundations; along edges of flower beds adjacent to flowering or ground cover plants; at the base of fences & walls in shady, protected locations and around susceptible green plants such as Spathiphyllum.

DO NOT USE ON or AROUND PLANTS GROWN FOR FOOD.

WHEN TO APPLY

Evening application gives most effective control. The effective life of the granules can be increased if watering is avoided for as long as possible after application.
