 EPA Reg. No. 5481-338

DIRECTIONS FOR USE
 It is a violation of Federal law to use this product in a manner inconsistent with its labeling. When ready to use, unwrap original package and follow ASSEMBLY INSTRUCTIONS. For Homes, Motels, Cabins, Garages: To control flies, mosquitoes, gnats, use one No-Pest Strip for an average size room (10 x 10 x 8 feet). Normally this is effective for four months. Replace strip if effectiveness diminishes.

INDUSTRIAL/COMMERCIAL
Garbage Cans & Trash Dumpsters
 For control of flies in garbage cans and dumpsters attach No-Pest Strip inside can or dumpster. Keep lid on can and dumpster closed.
Animal Buildings
 To control flies, mosquitoes, and gnats in Horse Barns, Calf Parlors, Hog Parlors, Stables, Poultry Houses, Tack Rooms and Dog Kennels, place one No-Pest Strip per 1,000 cu. ft. of space. If more than one strip is required, distribute them equally over area to be treated. Drafts, weather and other conditions may affect the performance, but these usually last four months. Replace when effectiveness diminishes. Do not contaminate food, water or foodstuffs. Do not contaminate milk or milking equipment.
Utility: To control Fire Ants, Wasps, and Bees which may commonly infest utility enclosures, cabinets, and junctions. Remove from sealed bag and hang so air can contact all sides of NO-PEST STRIP. Use NO-PEST STRIP in enclosed areas for utility equipment such as communication's equipment, electric, gas, water and cable television. Record installation date and replace when effectiveness diminishes.

Milk Rooms
 To control flies, mosquitoes, and gnats in milkrooms and bulk milk storage rooms hang one No-Pest Strip per 1,000 cu. ft. of space. Do not contaminate milk or milking equipment.
Catch Basins
 To control Mosquitoes breeding in catch basins, suspend one No-Pest Strip about 10 inches above water line. Usual control is 10 to 15 weeks. Replace strip when effectiveness diminishes.
Agricultural Commodities
 Bulk Storage of raw grains, corn, soybeans, cocoa beans, and peanuts. For control of Almond Moths, Cocoa Moth, Indian Meal Moth, and Mediterranean Flour Moths infesting non-perishable bulk stored raw agricultural commodities, suspend one No-Pest Strip per 1,000 sq. ft. of air space above the commodities before moths begin to emerge in early spring. Weather and drafts and other conditions effect the performance of the control, but this treatment usually lasts for four months. Replace strip when needed to prevent egg laying by moths.

HOUSEHOLD
Use as a Moth Killer
 Protects clothes against clothes moths for up to 6 months and leaves no smell. Remove from sealed bag and hang on wardrobe rail, ensuring that strip does not contact clothes or fabrics and that air can circulate around the Moth Killer. One strip will treat a space of 50 cubic feet (a space 3 ft. x 3 ft. with a 6 foot ceiling) for up to six months. Record the date of installation so that the old strip may be replaced with a new, fresh, full strength strip at the end of the 6 month period or when effectiveness diminishes.
Use as a Small Space Fly Killer
 Kills flies and other household insects all summer long. Remove from sealed bag and hang or stand, out of reach of children and pets, in an open space, away from windows. The "Small Space Fly Killer Strip" controls flies, beetles, earwigs, cockroaches, silverfish, mosquitoes, and other small household insects for up to 4 months. Do not use where unwrapped food is stored or allow the strip to come into contact with food or cooking utensils. Record the date of installation so that the old strip may be replaced with a new, fresh, full strength strip at the end of the 4 month period or when effectiveness diminishes.
Use as a Fly Killer
 Kills flies and other insects all summer long. Remove from sealed bag and hang or stand, out of reach of children and pets, in an open space, away from windows. One Fly Killer Strip will treat 1,000 cubic feet which can be equal to an average room 10 x 13 with an 8 foot ceiling for up to 4 months. In a larger room if more than one strip is required, keep them at least 10 feet apart. To "shut off" the unit, simply close the slide control thus sealing the strip back into the package. Record the date of installation so that the old strip may be replaced with a new, fresh, full strength strip at the end of the 4 month period or when effectiveness diminishes.
Use as a Mini-Strip Insect Control
 Household insecticide. Kills moths and silverfish in closets, wardrobes and storage areas for up to 4 months. Gives continuous protection from moths, silverfish and cockroaches and other insects for up to 4 months. Use in confined spaces of up to 106 cubic feet (6 ft. x 6 ft. x 3 ft.). Space larger than this will require more than one ministrip. Do not open inner pouch until ready to hang strip for use. Remove Ministrip from sealed pack. Hang or place in enclosed space where protection is required. Locate Ministrip so that direct contact with clothing cannot occur. Your Ministrip should be replaced after 4 months. A replacement "reminder sticker" is enclosed.

(Assembly instructions will vary somewhat with each package size)
