APR 24 2013

Dear Ms. Rahn:

Subject: Amendment: Submission of acute dermal toxicity study to change signal word
ALCO Small No-Pest Strip
EPA Reg. No. 5481-338
Your submission dated September 28, 2012

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) section 3(c)(7)(a), is acceptable and a stamped copy of the label is enclosed for your records.

As noted in the Agency's April 5, 2013 letter, determination of Restricted Use classification based on acute oral toxicity (as provisionally indicated in the toxicity review dated March 21, 2013) is being reserved at this time pending the Agency's receipt, review, and acceptance of AMVAC's submission of a product specific acute oral study for this DDVP strip product.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10), or durably marked on the container itself.

If you have any questions regarding this letter, please contact Dana Pilitt, PhD of my staff at (703) 305-7071 or via e-mail at pilitt.dana@epa.gov.

Sincerely,

Dana R. Pilitt
