

CONTROLS PREHARVEST DROP - APPLES AND PEARS

Spray trees thoroughly, wetting all fruit stems and adjacent leaves. K-SALT FRUIT FIX 200 becomes effective in 3 to 4 days after application and controls drop for two (2) weeks. Separate sprays should be applied to early and late maturing varieties. Do not make more than 2 applications and do not delay picking beyond optimum maturity. Do not spray within 2 days of harvest.

FOR DILUTE OR CONCENTRATE SPRAYING WITH GROUND EQUIPMENT

Crop	Dilute		Concentrate	Remarks
	Spray Conc. (ppm active ingredient)	K-Salt 200 per 100 Gals.		
Apples*	5-10 ppm (Eastern U.S.)	1.2-2.4 fl.oz.	16.0-22.0 fl.oz.	Apply to fruit 7 to 14 days before harvest.
	15-20 ppm (Pacific N.W.)	3.6-4.8 fl.oz.		
Pears (D'Anjou, Bosc and Bartlett)	10-15 ppm	2.4-3.6 fl.oz.	11.0-16.0 fl.oz.	Apply to fruit 5 to 7 days before harvest.

*For apples, variety and climatic conditions will affect the actual rate required.

SPRAY PREPARATION CHART

AMOUNT OF K-SALT FRUIT FIX 200 IN FLUID OUNCES

Conc. in ppm	Gallons	100	200	300	400
2		0.5 fl.oz.	1.0 fl.oz.	1.5 fl.oz.	2.0 fl.oz.
5		1.2 "	2.4 "	3.6 "	4.8 "
7.5		1.8 "	3.6 "	5.4 "	7.2 "
10		2.4 "	4.8 "	7.2 "	9.6 "
15		3.6 "	7.2 "	10.8 "	14.4 "
20		4.8 "	9.6 "	14.4 "	19.2 "

AERIAL APPLICATION

Aircraft should utilize spray equipment which gives thorough spray coverage to all portions of trees. Apply only when weather conditions favor minimal spray drift. Use lower rates for normal foliage and fruiting; the higher rates for dense foliage and heavy fruiting.

APPLES and D'ANJOU PEARS: Use 22 fluid ounces in at least 5 gallons of water per acre. Do not apply within 2 days of harvest.

BARTLETT AND BOSC PEARS: Use 11 fluid ounces in at least 5 gallons of water per acre. Do not apply within 2 day of harvest. When Bartlett and Bosc are interplanted, spray only once. Use a maximum of 11 fluid ounces per acre on Bartlett to prevent pre-mature ripening.

FOR USE IN PRESERVING ORNAMENTAL HOLLY BOUGHS

To delay leaf drop of Holly boughs, make a dip solution containing 8 to 16 fluid ounces in 100 gallons of water, (equivalent 33 to 66 ppm). Dip Holly boughs as soon as possible after cutting. Allow excess solution to drain. Do not soak or leave boughs in dip solution. Replenish dip solution as needed. However, to maintain concentration replace with fresh solution every 3 to 4 days. Package while moist to keep boughs fresh until used. Maintain at 34 to 40 degree temperature in bough storage area.

K-SALT 200 COMPATIBILITY WITH OTHER PRODUCTS

K-Salt Fruit Fix 200 is compatible with a wide range of pesticides. The mixtures should be first tested in a small area to insure the product performance and plant safety before large scale field use. Review all cautions and limitations on labeling of all products used in mixtures. DO NOT APPLY TANK MIX COMBINATIONS UNLESS YOUR PREVIOUS EXPERIENCE INDICATES THE MIXTURE IS EFFECTIVE AND WILL NOT RESULT IN APPLICATION PROBLEMS OR PLANT INJURY.

FOR RATES AND APPLICATION TIMING FOR YOUR SPECIFIC VARIETY AND LOCATION,
CONSULT YOUR LOCAL EXTENSION POMOLOGIST FOR RECOMMENDATIONS.

K-SALT™ FRUIT FIX 200

A HORMONE TYPE PRODUCT FOR THINNING APPLES, CITRUS, OLIVES, PEARS AND FOR CONTROL OF PREHARVEST DROP OF APPLES AND PEARS

ACTIVE INGREDIENT:

1-Naphthalene Acetic Acid, Potassium Salt - - - - - 6.25%

INERT INGREDIENTS: - - - - - 93.75%

Total 100.00%

Equivalent to 5.18% 1-Naphthaleneacetic Acid or 200 grams (0.44 lbs.) per gallon.

KEEP OUT OF REACH OF CHILDREN CAUTION

STATEMENTS OF PRACTICAL TREATMENT

IF SWALLOWED: Call a physician or Poison Control Center immediately. Induce vomiting by drinking 1 or 2 glasses of water and touching back of throat. Do not give anything by mouth to an unconscious or convulsing person. **IF IN EYES:** Flush eyes with plenty of water. Get medical attention if irritation persists. **IF ON SKIN:** Wash thoroughly with soap and water. **IF INHALED:** Remove to fresh air.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing spray mist. Avoid contact with skin, eyes or clothing. PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear long-sleeved shirt and long pants, waterproof gloves, shoes plus socks. Follow manufacturer's instructions for cleaning and maintenance; PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users should: Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, to areas where surface water is present, or to intended areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not contaminate ditches or water used for irrigation or domestic purposes. Do not apply when conditions favor drift from treated areas. Do not use in a greenhouse.

See Side Panel For Additional Precautionary Statements

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. Do not apply this product through any type of irrigation system.

K-Salt Fruit Fix 200 thins the fruit of apples, pears and certain varieties of citrus and olives to provide an adequate return bloom the following season. K-Salt Fruit Fix 200 controls pre-harvest drop of apples and pears, leading to a larger harvest and a reduction of losses from windfall and breakdown.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 24 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with any living plant that has been treated, such as plants, soil, or water, is: waterproof gloves, one piece plus "pants".

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. STORAGE in direct sunlight, dry, locked place out of reach of children. Do not allow residue from the use of this product may be disposed of on site or off site.

DISPOSAL

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or, if allowed by State and local authorities, by incineration, or, if allowed by State and local authorities, by

GENERAL INFORMATION

Use K-Salt Fruit Fix 200 in sufficient water to ensure good spray accordance with the manufacturer's directions.

CHEMICAL THINNING

Because of differences in varieties, climatic factors, tree vigor can range from 2 to 20 ppm and application timing can range to higher concentrations should be limited to vigorous trees or concentrations for weaker, less vigorous trees and less food re 5 ppm when a surfactant (wetting agent) is added. Use surfactant recommendations, but not more than 1 pint per 100 gallons of spray as Red Delicious, Golden Delicious and Rome should be treated locality and other factors. During cool springs, delay application 15 mm in diameter and forecasted daytime temperatures are 65°F. The preferred application temperature is between 70°F and 75°F or above 80°F. When daytime temperatures exceed 85°F or obtained under the latter conditions with lower rates of chemical

IMPORTANT: K-Salt Fruit Fix 200 should not be used on certain varieties (such as Yellow Transparent, Early Williams Red and McIntosh) such as Yellow Transparent, Early Williams Red a thinning may occur. Amid-Thin WG, (a registered trademark of Chemical Corp.), is recommended for these early season varieties.

CHEMICAL THINNING

Variety	Spray Concentration ppm Active Ingredient (Plus Surfactant)
Bartlett, Bosc and Comice	10-15 ppm

Apply K-Salt Fruit Fix 200 once per year 15-28 days after full bloom. Fruit Fix 200 may not adequately thin Bartlett some seasons. The preferred application temperature is between 70°F and 75°F or above 80°F.

For thinning of Apples and Pears, do not use K-Salt Fruit Fix 200 Fix 200 on young trees less than ten years old, or trees with tight

CHEMICAL THINNING

TIMING IS CRITICAL: Spray when young fruits are 1/8 to 3/16 inch. Thinning is effective on all varieties except *Stayman*. Do not apply all your fruit.

Apply a solution of 120 ppm by adding 28.8 fl. oz. and a wetting agent. The spray concentration should be adjusted upward full bloom during the thinning period.

CHEMICAL THINNING - ORANGES (Mandarins), TANGELOS /

Spray at the rate of 100 to 500 ppm (24 fl. oz. per 100 gals., wet obtained with K-Salt Fruit Fix 200 is highly variable and temporal from application to tree during hot and dry conditions. Do not determine a suitable concentration and time of application for it. Concentrations in the 100 to 150 ppm range should be tried an early stage of development (5 to 20 mm in diameter) and near the period of natural drop occurs in May.) Higher thinning activity. Therefore lower concentrations should be used during hot weather. These should be used during cooler and wet weather (65°F to 75°F) diminishes rapidly below 65°F. Do not apply more than 1 application both young and fruits close to maturity are present on tree. Do not apply to fruit that is still green.
