ORNAMENTAL USE

(For soil incorporation into potting media used in containerized plantings of ornamental trees, shrubs, plants, flowers, conifers, Christmas trees, and nonbearing fruit and nut trees, and bushes.)

APPLICATION INSTRUCTIONS FOR POTTING MEDIA: Determine bulk density of the potting media by measuring the dry weight of a unit volume of the mix. Based on the length of control required, thoroughly mix the appropriate quantity of the WISDOM NURSERY GRANULAR INSECTICIDE with equipment suitable to give uniform distribution in the potting media. WISDOM NURSERY GRANULAR INSECTICIDE may be pre-mixed with an appropriate amount of sand (1:10) to ensure adequate distribution of the product of the mix.

WISDOM NURSERY GRANULAR INSECTICIDE is approved under the USDA Plant Protection Imported Fire Ant Quarantine Certification program when used in accordance with USDA guidelines. Use the recommended application rates given in the table below to determine the length of control required for certification.

Pest	USDA IFA Certification Period (months)	App. Rate (ppm)	Potting Media Bulk Density*				
			(lbs. WISDOM NURSERY GRANULAR INSECTICIDE Per Cubic Yard)

Re: Wisdom™ Nursery Granular Insecticide (EPA Reg. No. 5481-522)

Notification:

- Final Printed Label (per 14 January 2005 approval letter)
- Inert Ingredient Heading per PR Notices 98-10 & 97-6

Dear Ms. Hobgood:

AMVAC is submitting a final printed label for this registration, as required by the Agency's approval letter of 14 January 2005 for this registration.

Label Modification by Notification – Inert Ingredient Heading

AMVAC is further notifying the Agency of a label change to this registration, restating the non-active heading portion of the ingredient statement to read "Inert Ingredients."

Justification:

- The use of "Inert Ingredients" as the heading is specifically allowed by PR Notice 97-6 (Section IV) which states "Other Ingredients" may be substituted, but "No registrant is required to make this change."
- Furthermore, the EPA *Label Review Manual* (Chapter 5.II.E) allows the heading to be "Inert Ingredients" or "Other Ingredients," adding "but either may be used."
- 40 CFR 156.10 (g) requires the heading to be "Inert Ingredients," and does not provide for "Other Ingredients" as an option.
- PR Notice 98-10 (Section N) allows for minor label changes to be made by notification when consistent with or specified by a PR Notice or are consistent with 40 CFR 156. As the use of "Inert Ingredients" as a heading meets those criteria, this label modification is made by notification.

In support of this notification, please find the following documents enclosed:

- Application for Pesticide Registration (EPA form 8570-1)
- PR Notice 97-6 – Copy for *Reference*
- EPA Label Review Manual – Excerpt of Chapter 5 (Section II) for *Reference*
- 40 CFR 156.10 (g) – Copy for *Reference*
- AMVAC Reference Label – (label ref 522-050121r2_REDLINE) – not to be stamped
- Revised Label – (label ref 522-050121r2) – one copy

Thank you very much for your attention to our application and response. Please call me if you have any questions, or need additional information.

Sincerely,

Darryl E. Brock
