**UNITED STATES ENVIRONMENTAL PROTECTION AGENCY**  
WASHINGTON, D.C. 20460

OFFICE OF  
CHEMICAL SAFETY  
AND POLLUTION PREVENTION

October 17, 2012

Kaila Moran  
Amvac Chemical Corporation  
4695 MacArthur Court, Suite 1250  
Newport Beach, CA 92660

Subject: Notification to Revise the Storage and Stability Statement  
EPA Registration Number: 5481-560  
Decision: 469647

Dear Ms. Moran:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration (PRN)98-10 dated September 05, 2012, for the abovementioned product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the actions requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions contact Driss Benmhend at 703-308-9525 or by e-mail at: Benmhend.driss@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Mark Suarez for,".

Mark Suarez  
Product Manager 13  
Insecticide Branch  
Registration Division (7504P)

**Subject: Notification of Storage and Disposal Statement Per PR Notice 2007- 4**  
**Fortress Technical (EPA Reg. No. 5481-492)**  
**Fortress 2.5G (EPA Reg. No. 5481-494)**  
**SmartChoice 2.5G (EPA Reg. No. 5481-560)**

Dear Sherada:

In accordance with PR Notice 2007-4, please find enclosed the notification to revise labeling for the above listed product. We have updated the Storage and Disposal Statement to comply with the language outlined in the Agency's PR Notice.

In support of this request, enclosed please find the following:

1. Application for Pesticide Registration for each product (EPA Form 8570-1).
2. ~~Two~~ copies of the label with one redline to show changes (Ref. No. 562-20120904r2; 494-20120905r6; 492-20120904r2).

It is my understanding that this satisfies the requirements of the Agency's PR Notice and will require no further action. If you have any questions or require additional information, please do not hesitate to contact me at 562-607-2146 or email [kailam@amvac-chemical.com](mailto:kailam@amvac-chemical.com). Thank you for your attention to this matter.

Best regards,

Kaila Moran  
Regulatory Consultant

Net Weight: 50 LBS.

<b>FIRST AID (Cont.)</b>	
Organophosphate and Pyrethroid	
<b>EMERGENCY INFORMATION</b>	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. FOR THE FOLLOWING EMERGENCIES, PHONE 24 HOURS A DAY:	
Transportation: CHEMTREC.....	1-800-424-9300
Other: AMVAC.....	1-323-264-3910
<b>NOTE TO PHYSICIAN</b>	
<b>This product is an organophosphate insecticide. ATROPINE IS THE EMERGENCY ANTIDOTE FOR INSECTICIDE POISONING. 2-PAM is also antidotal and may be used in conjunction with atropine.</b>	
<b>WARNING SYMPTOMS</b>	
SMARTCHOICE 2.5G is an organophosphate insecticide containing a pyrethroid and is a cholinesterase inhibitor. Overexposure to this product may cause toxic signs and symptoms due to stimulation of the cholinergic nervous system. Symptoms of poisoning may include weakness, headache, tightness in chest, blurred vision, non-reactive pin-point pupils, salivation, sweating, nausea, vomiting, diarrhea, muscle tremors and abdominal cramps. In severe cases, convulsions, unconsciousness and respiratory failure may occur.	
<b>TREATMENT</b>	
Atropine is the specific therapeutic antagonist of choice against this type of parasympathetic nervous stimulation. If warning symptoms appear, treatment should consist of parenteral atropine sulfate. This can be administered intramuscularly every 10 minutes until full atropinization (as indicated by dilated pupils, dry flushed skin and tachycardia) has been achieved and repeated thereafter whenever symptoms reappear. For infants and children, the dose of atropine sulfate is 0.05 mg/kg. For adults, 1 to 2 milligrams will be required for mild cases, but up to 4 mg may be needed for severe intoxication. 20 to 30 milligrams or more may be required during the first 24 hours.	
Pralidoxime chloride (2-PAM chloride) may also be used as an effective antidote in addition to and while maintaining full atropinization. In adults, an initial dose of 1 gram of 2-PAM should be injected, preferably as an infusion in 250 cc of saline over a 15- to 30-minute period. If this is not practical, 2-PAM may be administered slowly by intravenous injection as a 5 percent solution in water over not less than two minutes. After about an hour, a second dose of 1 gram of 2-PAM will be indicated if muscle weakness has not been relieved. For infants and children, the dose of 2-PAM is 20 - 50 mg/kg. Morphine is an improper treatment.	
Clear chest by postural drainage. Oxygen administration may be necessary. Observe patient continuously for 48 hours. Repeated exposure to cholinesterase inhibitors may, without warning, cause prolonged susceptibility to very small doses of any cholinesterase inhibitor. Allow no further exposure until cholinesterase regeneration has been attained as determined by blood test. Reversible skin sensations (parasthesia) may occur and ordinary skin salves have been found useful in reducing discomfort.	
For medical emergencies involving this product, call 1-323-264-3910.	

## PRECAUTIONARY STATEMENTS

### Hazards to Humans and Domestic Animals

**WARNING:** Harmful if absorbed through the skin. Causes moderate eye irritation. Wear a mask or pesticide respirator jointly approved by the Mine Safety and Health Administration and the National Institute for Occupational Safety and Health. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

Repeated exposure can lead to an asymptomatic increase in the susceptibility to poisoning. Avoid prolonged exposure to the product.

### PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category A on an EPA chemical-resistance category selection chart.

Loaders, applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Shoes plus socks

- Chemical-resistant gloves (except for applicators) such as barrier laminate, butyl rubber  $\geq 14$  mils, nitrile rubber  $\geq 14$  mils, neoprene rubber  $\geq 14$  mils, natural rubber  $\geq 14$  mils, Polyvinyl Chloride (PVC)  $\geq 14$  mils, or Viton  $\geq 14$  mils
- Loaders must also wear a respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G), or a NIOSH approved respirator with an (OV) cartridge, or a canister with any N, R, P or HE prefilter.

See Engineering Controls for additional requirements

### User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

### Engineering Controls

Applicators must be in enclosed cabs and must:

- Wear the PPE specified above for applicators
- In addition to wearing the required PPE, have available for use coveralls, chemical-resistant gloves, and protective eyewear if it is necessary to exit the cab and contact pesticide-treated surfaces in the treated area
- Remove PPE that was worn in the treated area before reentering the cab, and
- Store all PPE in a chemical-resistant container, such as a plastic bag, to prevent contamination of the inside of the cab.

### User Safety Recommendations

Users Should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of the gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

### ENVIRONMENTAL HAZARDS

This pesticide is toxic to wild mammals, birds, fish, and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when cleaning equipment or disposing of equipment washwaters. Apply this product only as specified on this label.

Granules lying on the soil surface at loading areas and in turning areas at row ends must be incorporated into the top one-inch of soil using suitable incorporation equipment to remove the possible hazard to birds and other wildlife.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the

7/10

**Double Notification:** Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas.

- Coveralls
- Chemical-resistant gloves such as barrier laminate, butyl rubber  $\geq 14$  mils, nitrile rubber  $\geq 14$  mils, neoprene rubber  $\geq 14$  mils, natural rubber  $\geq 14$  mils, Polyvinyl Chloride (PVC)  $\geq 14$  mils, or Viton  $\geq 14$  mils
- Shoes plus socks.

When emptying bags, pour downwind and allow the minimum of free fall of granules. Do not pour at face level and do not allow dust to reach the breathing zone.

SMARTCHOICE 2.5G is a granular soil insecticide for use on corn (field, sweet, popcorn and seed) at planting for the control of northern, western and southern corn rootworm larvae, wireworms, cutworms, seedcorn maggots, white grubs, grape colaspis and symphylans.

All registered corn herbicides may be applied to SMARTCHOICE 2.5G-treated corn.

Crop	Pest	Dosage and Comments
Field Corn Seed Corn Sweet Corn Popcorn	Cutworms Wireworms White Grubs Seedcorn Maggots Grape Colaspis Symphylans  Corn Rootworm Larvae* Northern Western Southern	6.0 to 7.0 ounces per 1,000 feet of row        *Aids in the control of corn rootworm larvae when used in combination with corn hybrids containing in-plant protection against corn rootworm larvae
	Corn Rootworm Larvae Northern Western Southern  Cutworms Wireworms White Grubs Seedcorn Maggots Grape Colaspis Symphylans	9 to 10 ounces per 1,000 feet of row  c c c c c c c c c c c                  c c                  c c c c c c c c c c c c c c c c                  c                  c                  c c c c c c c c c c c c c c c

**Application Restrictions:**

Do not make more than one application per year.

**Crop Rotational Intervals**

- Corn ..... Anytime
- Other crops ..... 30 days

**Application**

Apply SMARTCHOICE 2.5G with a granular pesticide applicator properly calibrated to assure accurate placement and proper application rate. SMARTCHOICE 2.5G should be applied in-furrow at planting for optimum control of labeled pests. DO NOT apply as a surface band behind the press wheel.

**In-Furrow Application at Planting**

SMARTCHOICE 2.5G can be applied in conventional, conservation or no-till corn as an in-furrow treatment. Place the applicator tube either directly into or behind the planter shoe, so that the granules drop into the open seed furrow and are completely covered with soil. In-furrow application provides optimal control of corn rootworms, wireworms, white grubs, seedcorn maggots, and grape colaspis.

**Further Application Information**

- Granules exposed on the soil surface in the turn areas at the row ends and in loading areas must be incorporated into the top one-inch of soil immediately after treating fields by disking, harrowing or other suitable means.
- Granular application equipment must be properly calibrated to accurately apply SMARTCHOICE 2.5G.
- Under windy conditions the use of wind shields is recommended to ensure proper placement of granules.
- SMARTCHOICE 2.5G is non-corrosive to equipment and is nonflammable.

**Determining the Amount of SMARTCHOICE 2.5G per acre**

To determine the approximate amount of SMARTCHOICE 2.5G needed per acre, select the use rate per 1,000 row feet and the row spacing.

Amount of SMARTCHOICE per 1,000 feet of row	Pounds of SMARTCHOICE 2.5G Required per Acre at Various Row Spacings						
	15 " or twin row	20 in	22 in	30 in	34 in	36 in	40 in
6.0 oz.	13.0	9.8	9.0	6.6	5.8	5.6	5.2
7.0 oz.	15.2	11.4	10.4	7.6	6.8	6.4	6.0
9.0 oz.	19.6	14.6	13.4	9.8	8.6	8.2	7.8
10.0 oz.	21.8	16.4	14.8	10.8	9.6	9.0	8.6

**CALIBRATION INSTRUCTIONS & GAUGE SETTINGS**

**Equipment Calibration**

The following **equipment calibration procedures** should be performed to ensure that the proper amount of SMARTCHOICE 2.5 G will be applied:

1. Fill insecticide hoppers with SMARTCHOICE 2.5G.
2. Attach a collection container to each tube opening to catch the insecticide.
3. Set your planter to the initial gauge settings shown in the chart.
4. Measure off 250 ft of row and drive planter, while metering the insecticide, the premeasured distance at the speed at which you will be planting.
5. The target catch weight for each container (at the 7.5 oz recommended rate) is 1.88 oz of granules. Determine

9/10

- the amount caught in each row either by weight or by volumetric approximation of weight.
- Repeat the calibration procedure above, as needed, until the insecticide caught in each container is as close as possible to the target amount.

Approximate Equipment Gauge Settings SMARTCHOICE 2.5G at 7.0 oz per 1,000 ft of row					
Equipment	Speed in mph

White Series 5100	9	13	15	17	20
White Series 6100	15	17	18	19	21

NOTE: These settings should be used as **starting points only**. Follow manufacturers recommendations for calibration of the specific equipment you are using or the calibration instructions above to make final adjustments. After initial calibration, recheck flow rate occasionally to make sure equipment wear, changing conditions, etc. have not caused a change in flow rate.

#### STORAGE AND DISPOSAL

**PESTICIDE STORAGE:** Store in a secure, locked, dry and temperate area where children, unauthorized persons or animals cannot enter. Store in original container. Keep the container closed when not in use. Do not transport or store near food or feed intended for human or animal consumption. Do not use or store in or around the home. Do not contaminate water, other pesticides, fertilizer, food or feed by storage or disposal.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or container is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Completely empty bag into application equipment.

10/10
