GRO WELL NO GRO WEED & GRASS KILLER
 For use on lawns, driveways, sidewalks, patios, and other areas where weeds and grasses are a problem. Apply this product only as directed on this label.

Best results will be obtained if you apply this product in an application which is made in the early fall or late fall. An early fall application should be made before weeds and grasses have had a chance to grow. Spray slowly, allowing material to penetrate the soil so that it will not run off into areas where desirable plants might be located. Final killing may be noticeable in several days but final killing may take up to 3 weeks for each plant or tree to die.

For **DRY LAWNS, PATIOS, PATIOS, TERRACES, COURTS, and GRASSY AREAS**, mix 1 quart of NO GRO in 2 gallons of water and apply to 150 square feet (15 x 10').

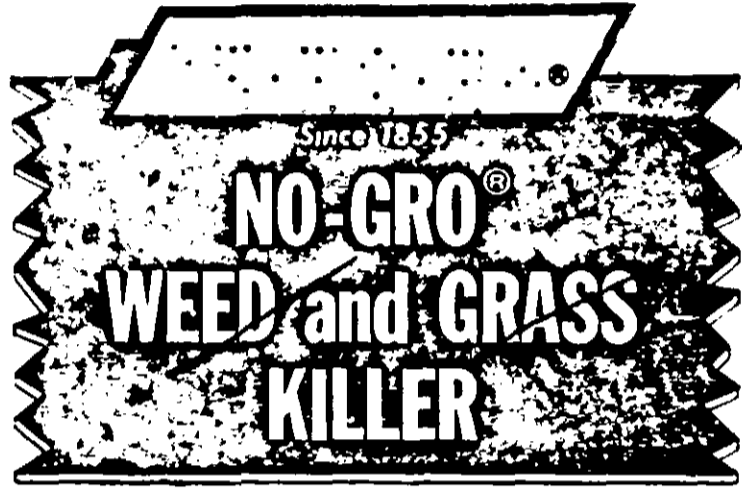

For areas of heavy growth, both weeds and grasses, such as a **NO GRO** or where vegetation is more than 24 inches high, mow down to at least 5 inches prior to application and mix NO GRO at the rate of 1 quart in 3 to 6 gallons of water and apply to 150 square feet (15 x 10').

If deep rooted **PERENNIAL WEEDS** such as Canada Thistle or Hoop Pines are present a second application 2 or 3 months later may be required.

CAUTION:
 Harmful if swallowed. Keep out of reach of children and pets and keep them off treated area until completely dry. Do not spray areas occupied by unprotected persons or animals. Avoid contact with eyes, nose, mouth, skin, clothing and breathing or spray mist. In case of contact wash thoroughly with soap and water, particularly before smoking or eating. Avoid contamination of feed and feedstuffs and water used for domestic or irrigation purposes. Do not store near seeds, fertilizers, insecticides, fungicides, herbicides or other flammable. Do not use on lawns or in areas containing desirable plants. Do not apply over root zone areas of desirable trees, shrubs, other ornamental plants or vegetable crops. Apply this material outside of the drip line of these plants. Avoid spray drift (a coarse type sprayer is preferred) to susceptible plants. Do not use in spray equipment for other purposes. Dispose of this container when empty. Do not reuse.

NOTE: Follow directions carefully on use, storage and handling of this material. Beyond the control of the seller, this buyer assumes all risks of directions given herewith are not strictly adhered to.

SOLD BY _____ U.S.D.A. REG. No. _____

**Semi-Soil Sterilant
 to control
 MOST VEGETATION FOR FULL SEASON**

ACTIVE INGREDIENTS:	
1,1-dimethoxy-4,6-bis(isopropylamino)-s-triazine	1.1%
Isopropyl Ester of 2,4-dichlorophenoxyacetic Acid	1.05%
Xylene	87.44%
INERT INGREDIENTS	9.41%
	TOTAL 100.0%
**Equivalent to 2,4-dichlorophenoxyacetic Acid	

**CAUTION: KEEP OUT OF REACH OF CHILDREN
