## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

## STORAGE AND DISPOSAL

**STORAGE:** Store in original container in a locked storage area, away from other pesticides, fertilizer, food and feed. Do not store near heat or open flame. If leaking or spilled, apply an absorbent, sweep up and discard in trash. Do not store diluted spray material. Make a new dilution for each use. Keep container tightly closed after opening. **PESTICIDE DISPOSAL:** Securely wrap original container in several layers of newspaper and discard in trash. **CONTAINER DISPOSAL:** Do not reuse empty container. Wrap container in several layers of newspapers and discard in trash. Rinse container thoroughly before discarding in trash.

**GRO-WELL<sup>®</sup> NO-GRO<sup>®</sup> WEED & GRASS KILLER** should be used strictly in accordance with directions when killing weeds and grasses (most vegetation) on DRIVEWAYS, WALKS, PATIOS, TENNIS COURTS, FENCE ROWS or any similar non-crop area, or where you desire to kill most vegetation for a full season period. A second application may be necessary in seasons with a high rainfall. In addition, NO-GRO may also be used under ASPHALT DRIVEWAYS or PARKING AREAS, applying prior to the laying of asphalt or cement. Apply this product only as specified on this label.

Best results will be obtained if the ground is wet before application and application is made in early Spring before weeds germinate. In any event, application should be made before weeds are four (4) inches tall for proper results. Thoroughly wet all parts of the plant and apply evenly. Spray slowly, allowing material to penetrate the soil so that run-off does not occur into areas where desirable plants may be located. Partial killing may be noticeable in several days, but final killing may take 2 to 3 weeks through penetration to the roots. For DRIVEWAYS, WALKS, PATIOS, TENNIS COURTS and GRAVELED AREAS mix 1 quart of NO-GRO in 2 gallons of water and apply to 150 square feet (15 x 10').

For areas of heavy growth, both weeds and grasses, such as along FENCE ROWS or where vegetation is more than 24 inches high, cut or mow down to at least 8 inches prior to application and mix NO-GRO at the rate of 1 quart in 3 to 6 gallons of water and apply to 150 square feet (15 x 10').

If deep-rooted PERENNIAL WEEDS such as Canada Thistle or Milkweed are present a second application 2 or 3 months later may be required.

## WARRANTY STATEMENT

Follow directions carefully, as use, storage and handling of this material is beyond the control of the seller. The buyer assumes all risks if directions given herewith are not strictly adhered to. Seller gives no other or further Warranty, expressed or implied as to the merchantability or any other aspect of products sold.
