**MICROWAVE OVEN CLEANER**  
*Shines Cleans Disinfects*

MICROWAVE OVEN cleaning problems are unique, because the oven interior seldom rises above room temperature, and germs often survive the cooking process. MICRO-MAGIC kills most germs on contact, while it disinfects and leaves the oven walls shining clean, thereby improving the heating pattern within the oven. Use MICRO-MAGIC to clean and disinfect oven cavities, doors, door grills, light bulbs, panels, vinyl-surfaces, stainless steel, glass, pyrex and all other surfaces inside and outside the oven.
