

[5590-160]

**DIRECTIONS FOR USE:**

U.S. Public Health Service-Section 71, 102(b) Part 71, Title 42

I. The insecticide shall be released at an amount of not less than 5 grains (1 gram/sec) for each 1,000 cubic feet of enclosed space in the aircraft, and shall be released or sprayed

II. Disinfecting may be accomplished either while the aircraft is on the ground before take-off from the last airport before arrival in the United States, or after departure from such airport (for compartments accessible in flight). In no case shall disinfecting be accomplished later than 30 minutes before the first landing at a United States port.

III. USE NO GREATER DOSAGES THAN REQUIRED.

EXCESSIVE SPRAYING IS WASTEFUL.

The ventilation system shall be stopped and all openings to the exterior kept closed while the insecticide is being released or sprayed and for a period of not less than 3 minutes thereafter. If disinsectization is accomplished on the ground prior to take-off, the ventilation system may be opened at the end of such period provided that the system is equipped with filters or other means for preventing the entrances of insects into the aircraft, but doors, windows or other such openings to the exterior shall be kept closed until after the take-off except in the case of emergency, or to permit persons applying the insecticide to disembark.

**TO OPERATE AEROSOL**

Remove protective cap. Holding dispenser upright, point nozzle in desired direction and press dispensing button to spray. Replace protective cap to prevent accidental discharge when not in use.

**ACTIVE INGREDIENTS:**

Pyrethrins	0.60%
*Piperonyl butoxide, tech.	1.40%
Petroleum distillate	13.00%
<b>INERT INGREDIENTS:</b>	<u>85.00%</u>
	100.00%

\*Equivalent to 1.12% (butylcarbityl) (6-propylpiperonyl) ether and .28% related compounds.

**CAUTION:** Cover or remove all food and feedstuffs prior to application to prevent contamination.
