

HUB STATES TUNER OF POWER

DIRECTIONS FOR USE

Professional Insect Bomb will effectively control flies, mosquitoes, wasps and flying moths, roaches, ants, crickets, silverfish and exposed stages of stored products insects, when used as directed.

FOR FLIES, MOSQUITOES, WASPS AND GNATS Close all doors and windows. Point nozzle upward, direct the aerosol mist to all parts of the room, especially windows and other light sources which attract these insects. For best results, keep nozzle in motion while spraying. Allow 3 to 5 seconds spraying time per 1,000 cubic feet of space. Keep room closed at least 15 minutes after each treatment.

FOR ROACHES, ANTS, SILVERFISH AND CRICKETS Open all inside doors, cabinets, closets. Direct the mist toward insects, into cracks, crevices and trails, on floor sills and window frames. For initial application, apply for 30 to 45 seconds for each 100 square feet of floor space. Follow this up with periodic space applications of 3 to 5 seconds per 1,000 cubic feet. Keep room closed for one hour after application. Repeat treatment when necessary.

FOR STORED PRODUCTS INSECTS EXPOSED STAGES: For such insects as flour beetles and granary weevils, spray insects into cracks, crevices and around machinery, around containers of stored products and other areas where these insects may hide. It is important to contact as many insects as possible. A minimum of 30 seconds treatment time should be used for each 100 square feet of floor space. Treated area should be kept tightly closed for at least 45 minutes. Repeat treatment when necessary.

FOR SUCH INSECTS AS FLOUR MOTHS AND INDIAN MEAL MOTHS Close all doors and windows. Direct mist to all parts of the room, especially into dark areas and behind stored products containers where adult moths may be hiding. A minimum treatment time of 6 to 8 seconds should be used for each 1,000 cubic feet of space. Keep treated area closed for at least 30 minutes. Repeat weekly or when flying moths appear.

CAUTION: Use the product as a space spray in food processing plants only when plant is not in operation. Foods should be moved or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using. Remove Pets, Birds and Fish Tanks from room before spraying.

U.S. A. Reg. No. **100000**

ACTIVE INGREDIENTS: Pyrethrin 0.50% (Technical Piperonyl Butoxide 4.00% Petroleum Distillates 8.00%)
