RECOMMENDATIONS

When applied as an aerosol with the Hub States Pulsfog applicator, Hub States Formula 62 is recommended for control of Red Spider (Spider Mites) on Chrysanthemums, Carnations and Roses.

(1) Close all doors, windows and ventilators. (2) Lock or barricade all entrances, post warning signs, take precautions to prevent persons and animals from entering the area. (3) Turn off all misting systems, fans and sulphur pots. Be certain all blossoms and foliage are dry. (4) Room temperature should read from 70° to 85° F. for best insect kill.

APPLICATION: DOSAGE—(1) Calculate in cubic feet the greenhouse space to be treated. For most greenhouse ornamentals—1 ounce of Formula 62 will treat 3,000 cubic feet of space; 16 ounces will treat 50,000 cubic feet, and 32 ounces will treat 100,000 cubic feet.

(2) Pour into the Hub States Pulsfog applicator insecticide tank the required number of ounces of Formula 62 to treat the calculated space.

APPLICATION: METHOD—Wear a full faced gas mask with canister type recommended by the U.S. Department of Agriculture for chlorinated insecticide protection. (1) Open the metering valve on the Hub States Fog applicator counterclockwise to the No. 4 setting on the dial. Eight ounces of liquid will be fogged per minute with a mass median diameter of 5 microns. (2) Start the pulsating jet engine of the Hub States Pulsfog applicator and allow it to run for one full minute before opening the insecticide valve. (3) Walk backward down the entire length, swaying the machine back and forth, to blanket two benches from each side of the aisle. Keep the Hub States Fog applicator nozzle at a minimum of four feet from plants. The Hub States Fog Applicator should never be in a fixed position—it is to be constantly moving so as to cover the entire area as evenly as possible. Do not over apply to the point where foliage is visibly wet. Where bench Chrysanthemums, Roses and other crops are of such height where it is difficult to fog over the plants without wetting the foliage, then direct the fogging operation under the benches. Sway the machine back and forth, occasionally pointing the Hub States Fog applicator nozzle upward where possible. Repeat applications as often as necessary. Keep nozzle a minimum of 4 ft. from the plants.

DURATION OF EXPOSURE: Length of exposure time is 1½ hours with ventilators and doors closed. After this exposure time, house should be well ventilated—at least 1 hour—before re-entering.
