DIRECTIONS FOR USE

Always use a good insecticide sprayer designed for the specific application. Spray into space to kill flying insects. Spray surfaces as directed to kill crawling insects. Follow directions for best results.

TO KILL ROACHES, WATERBUGS, SILVERFISH, CRICKETS, SPIDERS, TICKS, CENTIPEDES and certain other crawling insects: Apply directly into infested areas and onto infested surfaces. This drives insects out for contact with the killing mist. Where possible spray heavily all cracks, crevices, under cabinets, sinks, around drains, floors, and any place where these pests crawl, nest or breed. Repeat weekly, or as needed to maintain lasting control.

TO KILL ANTS: Spray along ant trail, into nests, porch landings, building supports, foundations or the sides of the house up to window level. Spray into all openings from which the ants emerge. Repeat as necessary.

TO KILL FLIES, MOSQUITOES, GNATS, WASPS and certain other living insects: Discharge spray mist into corners, under furniture, and upward in center of rooms. Keep room closed for at least 10 minutes.

TO KILL MOTHS: Brush and air garments. Spray closet walls, floor, thoroughly. Spray clothing completely under lapels, pleats, seams. Keep sprayer a foot away. Repeat in 30 days.

TO KILL BEDBUGS: Spray sheets, blankets, pillows. Spray both sides of mattress liberally, especially tufts and seams. Dismantle bed, spray joints, cracks. Spray walls, baseboards, window trim.

FLEAS INFESTING PREMISES can be controlled quickly and effectively by spraying floors and cracks of the infested areas. Fleas lurk in carpets and upholstered furniture. Spray liberally in these areas, as well as in baseboards, wall cracks and sleeping quarters of animals for direct contact with these pests.

Lot No.

USDA Reg. No. 5602-80

Hub States Corporation

ADVANCED PRODUCTS FOR ENVIRONMENTAL SANITATION

2008 North Illinois St. Indianapolis, Ind 46202 - Phone 317-925-1431

FOGGING FORMULA II

ACTIVE INGREDIENTS:

	By Wt.
Refined Petroleum Oil	98.6%
N-Octyl bicycloheptene dicarboximide	0.5%
Technical Piperonyl Butoxide*	0.5%
Pyrethrins	0.4%
Total	100.0%

*Equivalent to 4.2% of (butylcarbityl) (6-propylpiperonyl) ether and .1% related compounds.

CAUTION

KEEP OUT OF REACH OF CHILDREN

STORED PRODUCTS INSECTS, WEEVIL, CADELLE AND CONFUSED FLOUR BEETLES, FLOUR MOTHS: These can be controlled when in the exposed or accessible stages by the following treatment: Floors, walls and partitions in feed mills, food processing plants, empty box cars should be sprayed with enough solution to wet the surface, paying attention to cracks and crevices where insects may be harbored. When reinfestation occurs, repeat the application. Watch for migration periods immediately after or during hot weather. This will materially aid in controlling these pests.

When using in a food processing plant, be certain to remove all food or cover this food during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product as a space spray in these areas, apply only when plant is not in operation.

APPLICATION

For space spraying, adjust the nozzle faucet lever to the position shown to produce a very fine cloud of mist. **FOR BEST RESULTS BEFORE SPRAYING, CLOSE ALL OPENINGS AND TURN OFF AIR CONDITIONING AND VENTILATING SYSTEMS.**

CAUTION

Keep out of direct sunlight. Do not spray around open flame, plant life, food, fish bowls. Keep from reach of children. Harmful if swallowed. Keep outside buildings during treatment and until they have had sufficient airing.
