

[5602-84]

An insecticide for use in baking companies, bottling plants, breweries, candy factories, canneries, dairies, distilleries, flour mills, horse stables, hospital maintenance areas, kennels, macaroni companies, meat packing plants, nut processing companies, restaurants, rice mills, seed houses, and spice mills.

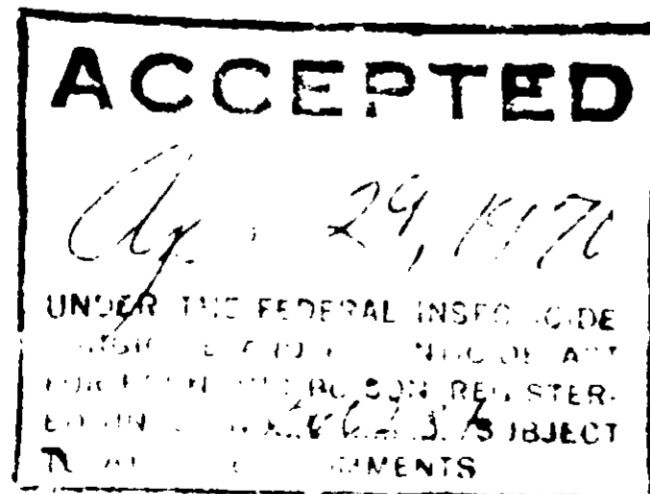

Kills accessible stages of roaches, crickets, ants, flour and grain beetles, flour moths, grain weevils, brown dog ticks, fleas, spiders, house centipedes on contact; also flies, mosquitoes and gnats. Recommended for use in fogging applicators and can also be applied by electric sprayers and compressed air sprayers.

DIRECTIONS

Fogging Application Indoors:

After closing off all air currents, direct fog upwards at walls and ceilings so that as many insects as possible can be contacted with a direct vapor or fog. When application is made with the Hub States applicator for flying insects, use one ounce of Hub States Fogging Formula H-5 per 3,000 cubic feet of space. Doors and windows should be closed for at least 1 hour after fogging; then sweep up and destroy all dead and dying insects. Repeat when necessary.

For exposed stages of roaches, crickets and ants, use at the rate of 1 ounce of Hub States Fogging Formula H-5 per 1,000 cubic feet of space, first directing the fog nozzle close into cracks and crevices to wet the surfaces then walk backward down the center aisle of the room swaying the applicator back and forth to blanket the entire cubical contents of the room. Length of exposure time is 1 hour with windows and doors closed. After this exposure time, the room should be ventilated-- at least 1 hour before re-entering; then sweep up and destroy all dead and dying insects.

Hub States

FOGGING FORMULA H-5

A Powerful Fogging and Contact Insecticide

ACTIVE INGREDIENTS:

Pyrethrins-----	0.50%
Technical Piperonyl butoxide*-----	1.00%
N-Octyl bicycloheptenedicarboximide**-----	1.00%
Petroleum distillate-----	97.50%
TOTAL-----	100.00%

*Equivalent to .80% of (butylcarbityl) (6-propylpiperonyl) ether and to .20% of related compounds.

**MGK-264

CAUTION
KEEP OUT OF THE REACH OF CHILDREN
See Side Panel For Additional Precautions.

Direct Contact Spraying

For the control of crickets, roaches, water-bugs, brown dog ticks, fleas, house centipedes, silverfish, and spiders, direct a wet spray toward infested areas, floors, cracks and crevices to hit the insects. Thorough application should be made repeating treatments as often as necessary. Apply Hub States Fogging Formula H-5 with an efficient hand or power sprayer that will deliver a medium size droplet.

CAUTION

Do not contaminate food, feed, milk, milk handling equipment or drinking water. Avoid pouring, spraying, or storing near fire or flame. Harmful if swallowed. Keep away from children. Avoid breathing spray mist. Remove pets, birds and fish bowls before applying.

Use this product as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using.

DO NOT REUSE CONTAINER.

DESTROY WHEN EMPTY
