# NITATION ADVANCED PRODUCTS FOR ENVIRONMENTAL SANITATION ADVANCED PRODUCTS FOR ENVIRONMENTAL SANITATION ADVANCED

This product is a finely divided powder which combines the flushing and killing powers of pyrethrins and piperonyl butoxide with the dehydrative principle of thermally attrited hydrogel. It is relatively odorless and non-staining and may be used in accordance with directions in homes, restaurants, stores, hotels, offices, plants and warehouses. When used as directed, it is highly effective in controlling such insects as ants, roaches, silverfish, bed bugs, fleas, lice, ticks and dry wood termites.

### DIRECTIONS FOR USE

Use in homes, restaurants, stores, offices, plants and warehouses as follows: To control such running and crawling insect life as ants, cockroaches, silverfish, and fleas in animal quarters, distribute Dri-Kil at the rate of 2 ounces per 100 square feet of surface area. Apply a continuous visible film underneath and behind stoves, refrigerators and appliances. Treat on, around and behind moulding, shelving, baseboards, pipe openings, cracks, crevices and other areas where insects may hide. For severe infestations apply Dri-Kil behind cabinets and walls, in crawl spaces and attics, at the rate of 16 ounces per 1000 square feet of surface area. Repeat treatment as necessary.

**SEWER TREATMENTS:** American and Oriental cockroach infestations in sanitary sewers may be treated with approximately 1.3 lb. Dri-Kil per manhole. When treating sewers, one manhole per 200 feet of line should be treated. Treatments are made by removing the manhole cover and replacing with a disc of plywood bored to receive the usual flexible hose from portable or truck-mounted ventilating equipment. A one-pound coffee can will hold about 0.3 lb. of Dri-Kil. This amount is introduced into the ventilating air, to be dispersed quickly and thoroughly through the system.

**BED BUGS:** For the control of bed bugs in homes and hotels take bed apart. Dust into joints and channels. If hollow, such as square or round tubing, see that the interior of framework is well dusted. Mattress should be dusted especially tufts, folds and edges. Picture frame moldings and all cracks and crevices in room should be treated.

**KEEP OUT OF THE REACH CHILDREN**

See side panels for additional cautions.

**DRY WOOD TERMITES:** Use Hub States Dry-Kil Insecticide for the control of Dry Wood Termites in infested homes, plants, warehouses and offices. These termites are restricted to certain parts of the country and should not be confused with Subterranean termites. Use an electric or hand-operated rotary duster to distribute Dri-Kil through an entry, e.g., crawl hole into the attic and crawl space of the building. Rate of application is recommended at one (1) pound per 1,000 square feet of floor area. All wood surfaces must be covered. All vents and louvres on the windward side to be closed.

**FLEAS-DOGS AND CATS:** Liberally apply powder to the animal, rubbing thoroughly to skin. Begin with the neck and include the underbody, legs, feet, and the base of the tail. Repeat as necessary. Surfaces of kennels should be dusted at rate of one ounce per 50 square feet. Heavily infested lawns, basements and crawl spaces should be dusted at the rate of 16 ounces per 1000 square feet. Repeat as necessary.

**CAUTION**

KEEP OUT OF REACH OF CHILDREN. Avoid inhalation. Dispose of wastes by burying in non-crop lands away from water supplies. Container should be disposed of by burying with wastes or by burning. Keep out of smoke. Do not use in commercial food preparation areas or in edible products areas of food processing plants.

This product is toxic to fish and wildlife. Keep out of lakes, streams or ponds. Apply this product only as specified on this label.
