**DIRECTIONS FOR USE**

The following are general recommendations for labelling this product for lawn use.

**ANTS, CHIGGERS:** Use 2 pounds of this product in 50 gallons of water per acre. More water may be used if necessary for complete coverage. Apply thoroughly to infested areas so as to soak the colonies.

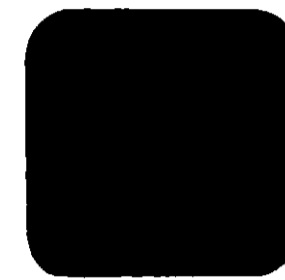

**JAPANESE BEETLE GRUBS, WIREWORMS, WHITE GRUBS, WHITE FRINGE BEETLE GRUBS, EUROPEAN CHAFERS:** For initial kill or 1 year control use 5 to 8 pounds of this product per 100 gallons of water (2.5 to 4 pounds Chlordane) or sufficient water to obtain adequate coverage per acre. For more lasting control or 2 to 3 year control, apply 20 pounds of this product per 100 gallons of water (10 pounds Chlordane) per acre. Apply to the surface of the soil before seeding. In the case of lawns, apply to the surface of the turf. Use additional water if necessary to soak soil to a depth of 4-9 inches.

**CHINCH BUGS:** Apply this concentrate at the rate of 4 pounds per 100 gallons of water (2 pounds of Chlordane). For coverage per acre which will control both the adult and the immature chinch bug for a period of 1 to 2 months. Apply to the surface of the soil in infested areas.

**ADULT MOSQUITOES:** For outdoor control, apply this product at the rate of 4 pounds per 100 gallons of water (2 pounds Chlordane) per acre. Spray thoroughly vegetation around recreational areas such as parks, lawns, and golf courses to a height of 10 feet.

See side panels for additional cautions

**SUBTERRANEAN TERMITES:** A chemical barrier between the termites in the soil and wooden structures and foundations is necessary to obtain good control. Therefore, soak the area using 8 to 10 pounds of this product per 100 gallons of water (4 to 5 pounds Chlordane). A trench should be dug approximately 8 to 12 inches wide next to the foundation walls. This trench may be up to 30" deep; however, in no case should it go beneath the base of the footings. Apply finished solution at the rate of 1 gallon per linear foot of trench.

Annual termite inspections should be made as follows: annual visual examination of all foundation footings should be made to detect termites. Any alates (swarmers) indicate current termite activity. All wood structures, such as sills, baseboards, etc. should also be checked for the presence of white termite worms.

### CAUTION

Keep out of the reach of children. Avoid inhalation of dust or spray. Harmful if swallowed. Contact with skin causes toxic symptoms. In case of contact with skin, wash with soap and water.

Avoid contamination of food containers, foodstuffs and feeds.

This product should not be used on any animals.

This product is toxic to fish and wildlife. Keep out of lakes, streams, or ponds. Birds feeding on treated areas may be killed. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not reuse container. Destroy when empty.

Apply this product only as specified on this label.
