

27 MAY 1992

Ms. Ruth Dodds
Hub States Corporation
8455 Keystone Crossing, Suite 150
Indianapolis, in 46240-4303

Dear Ms. Dodds:

Subject: Revised Labeling in Response to PR Notice 91-7
Reg. No. 5602-167 Pro-Cide
Reg. No. 5602-169 V-26
Reg. No. 5602-170 Pro-Cide III
Submissions dated April 20, 1992

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

In accordance with the Resmethrin Registration Standard, modify the label declaration for resmethrin in Reg. No. 5602-170 to read: "Resmethrin".

For Reg. Nos. 5602-167, 5602-169, and 5602-170, delete the active ingredient label declarations of "petroleum hydrocarbon oil base", "aromatic petroleum hydrocarbons", and "petroleum distillates" from the respective labels and add the corresponding percentages to the inert ingredients. The phrase --"Contains petroleum distillates"-- should then be added as a substatement to the ingredient statement. If you choose not to include these petroleum derivatives as inert ingredients, you are responsible for any data required to support their reregistration as active ingredients.

Delete the term "related compounds" from the label ingredient declaration for Reg. Nos. 5602-169 and 5602-170. Unless otherwise substantiated, these compounds should be considered inert. If the "related compounds" are determined to be active, they should be incorporated in the declaration for the active ingredient and not distinguished as "related compounds" or "other isomers".

293

Please be advised that several ingredients in your products have been identified as Class I or Class II substances under Title VI of the Clean Air Act, 1990 Amendments. Based upon this Act, Congress has implemented provisions to protect the stratospheric ozone layer from deterioration. Please review PR Notice 92-3 for further guidance. Any questions concerning this issue are welcomed by the Agency.

Sincerely,

RFM

Richard F. Mountfort
Product Manager (10)

PRO-CIDE

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use in non-residential food handling areas of food processing plants, dairies, milking parlors, restaurants, cafeterias, and markets.

FLIES, MOSQUITOES, GNATS, WASPS, AND BEEFLIES: Ascertain the cubic feet of space to be treated. Pointing nozzle upward, direct the aerosol mist especially around window frames and other light sources. Keep nozzle in continuous motion at least 10 feet. Apply for two seconds per 1000 cubic feet of space. Repeat treatment every 15 minutes after each treatment. Do not remain in treated area until after treatment is completed. Sweep up and dispose of debris after treatment as necessary.

STORED PRODUCT INSECTS (SPRAYS)

FLYING MEDITERRANEAN FLOUR MOTHS, INDIAN MEAL MOTHS, ANGOUMOIS GRAIN MOTHS: Close room. Spray aerosol mist to all parts of the room, especially around stored product containers where adult insects are present. Minimum treatment of six to eight seconds per 1000 cubic feet of area closed for thirty minutes after each treatment. Repeat treatment as flying moths appear. Infested stored product should be fumigated or treated with an approved product.

STORAGE AND DISPOSAL

Storage: Do not use or store near heat or open flame.
Disposal: Replace cap and discard container in trash.

PRECAUTIONARY STATEMENTS HAZARD TO HUMANS AND DOMESTIC ANIMALS CAUTION

Harmful if swallowed. Avoid breathing vapors or skin contact. Wash skin, eyes or clothing. In case of contact immediately flush with plenty of water. Get medical attention if irritation persists.

Avoid contamination of feed and foodstuffs. When used in food processing plants, food should be removed or covered during application. Food processing surfaces should be covered during application. Cleaned before using. When using this product in a facility that is not in operation, remove pets, birds, and children before spraying.

Physical or Chemical Hazards

Contents under pressure. Do not puncture or incinerate. May cause bursting at temperatures above 130°F.
