AN AEROSOL INSECTICIDE WITH PYRETHRINS and PIPERONYL BUTOXIDE

NET WT.
16 LBS. 8 OZ.
(7.48 Kg)

ACTIVE INGREDIENTS

Pyrethrins 0.5%
 *Technical piperonyl butoxide 4.0%
 *equivalent to 3.2% (butylcarbityl) (6-propylpiperonyl) ether and 0.8% of other related compounds

INERT INGREDIENTS

..... 95.5%
 Total 100.0%

CAUTION KEEP OUT OF REACH OF CHILDREN

Do not spray directly on food or utensils • Do not use this product in any room where live fish or other aquatic or cold blooded life is kept • Use this product as a space spray in food processing plants only when plant is not in operation • All food processing surfaces should be covered or thoroughly cleaned before using • Vacate area before beginning treatment. Ventilate area when treatment is completed. Sweep up and destroy fallen insects.

EPA REG NO 5602-168 EPA EST NO 5602-SC-01

A Product of
 Hub States Corporation
 Indianapolis, Indiana

FOR USE ONLY IN NON-RESIDENTIAL FOOD-HANDLING AREAS.

DIRECTIONS FOR APPLYING A-20

IMPORTANT—First read the precautions printed on Right Panel of Label.

ENTOMOLOGICAL RECOMMENDATIONS: When applied as an aerosol, A-20 is recommended for use against small flying moths and accessible stages of certain stored product insects, flies, flour moths, grain moths, mosquitoes, wasps, gnats and other flying insects, when used as directed.

A-20 applied as an aerosol in warehouses and factory areas kills by contact. Therefore, all treated areas should be kept closed for a period of 20 minutes. Repeat treatment as required. Sweep up and destroy fallen insects.

FOOD PROCESSING PLANTS: Use this product as a space spray in food processing plants only when plant is not in operation. All food processing surfaces should be covered or thoroughly cleaned before using.

PREPARATION OF FACTORY AND/OR WAREHOUSE AREAS: The preparation of factory or warehouse areas is based

primarily on the number of cubic feet of area to be treated. Several A-20 units can be mounted and wired in series. This enables two or more units to be activated simultaneously through the use of a single electrical switch.

TREATMENT OF FACTORY AND/OR WAREHOUSE AREAS: The number of units is based on an application rate of 1.5 grams of A-20 per 1000 cubic feet. This 16.5 pound cylinder will treat an area of 50,000 cubic feet for a period of 100 days, when actuated at one application per day.

Treated areas should not be opened for a period of 30 minutes or until aerosol particles have settled.

Seller makes no warranty, express or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

COMPRESSED GAS, N O.S.

(CONTAINS CHLORODIFLUORO-METHANE MIXTURE)
 NONFLAMMABLE GAS UN-1956 NONFLAMMABLE GAS

Lot No.

How to assemble and operate SOLENOID VALVE

1. Attach solenoid valve to cylinder with slight wrench pressure.
 Note: Valve should be attached in inverted position. Open cylinder valve 2 turns - check for leaks.
2. Invert cylinder and slide into bracket.
3. When utilizing triple nozzle automatic valve, set application timer to correspond with dosage recommendations on left panel.

The mechanical equipment used in the application of this insecticidal composition is covered by United States Patent Number 3,209,950 owned by Hub States Corporation.

CAUTION

This cylinder contains a liquid under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130° F may cause bursting. Never throw container into fire or incinerator.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal. **STORAGE:** Store in a cool dry place away from heat or open flame. **DISPOSAL:** Do not reuse empty container. Wrap container and put in trash collection.
