

SUBTERRANEAN TERMITES

Directions for Non-Professional Use

Use 74% Chlordane in a 1% water emulsion. Prepare this emulsion as follows: Use one pint of 74% Chlordane in 15 gallons of water. Mix thoroughly.

Buildings Having Basements or Crawl Spaces

Dig a trench along the outside of the foundation walls. In brick or hollow block or concrete foundations, dig a trench to, but not below, the footing. Then as the trench is refilled, treat the soil at the rate of 4 gallons per 10 linear feet for each foot of depth. A trench 3 feet deep would require 12 gallons per 10 linear feet.

The objective is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment. It is suggested that you consult the State Extension Service for advice.

Apply this product only as specified on this label.

WARNING - IMPORTANT

May be fatal if swallowed. Avoid breathing spray mist. Contact with skin can cause toxic symptoms. In case of contact with skin, wash with soap and water. For eyes — flush with water for 15 minutes, get medical attention. Wash hands after use. Avoid contamination of feed and foodstuffs. Do not use on household pets or humans. DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME. Do not contaminate drinking water or use near fishponds, etc.

This product is toxic to fish, birds and other wildlife. Birds and other wildlife in treated areas may be killed. Keep out of lakes, streams or ponds. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes.

DISPOSAL

Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.
