

# DIRECTIONS

Turn adjustable nozzle (to open) by rotating to deliver a coarse, wet spray, or jet stream. Coarse sprays are less likely to drift. Stand as close to weed as possible. No need to stoop or squat with jet stream spray. Aim nozzle at weed. Do not drench weeds—a light application to wet the crown of the weeds is sufficient. When treating weedy grasses, a second application should be made after five to seven days. Apply when weeds are young and growing vigorously. After application, you may notice that, for a short period, the sprayed weeds may flourish. Hormone-like chemicals in this product causes the weed to grow so fast that the whole plant, including the root, dies. Do not discard this bottle. Refill concentrate is available from your dealer.

## NEW! Aim and Spray CRABGRASS LAWN WEED & Dandelion KILLER

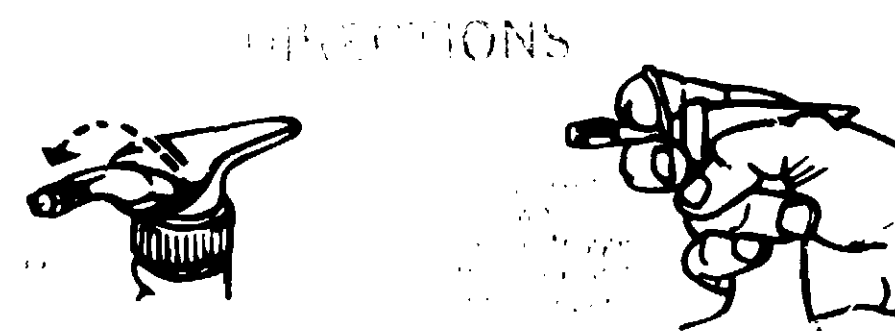

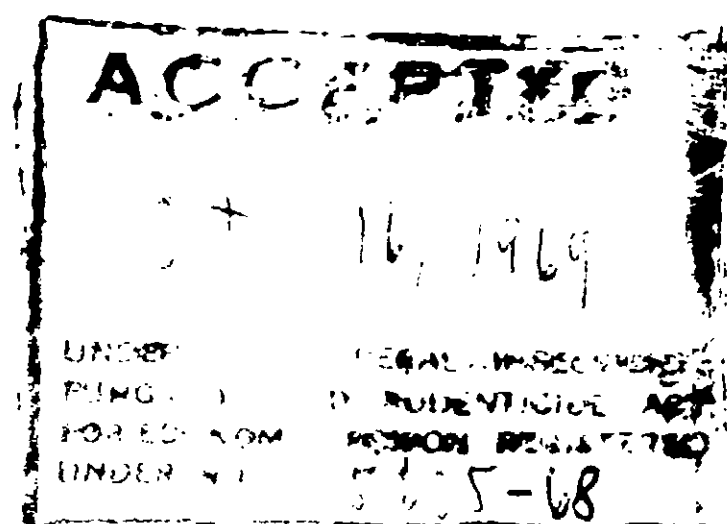

### ACTIVE INGREDIENTS:

*Anhydrous disodium methanearsonate	0.692%
**2,4-Dichlorophenoxyacetate Sodium Salt Monohydrate	0.3 %

## CAUTION

1. Harmful if swallowed. Avoid contact with skin. Avoid breathing dust or spray mist. Wash hands after using. Avoid storage near food and feed products. Keep away from children and domestic animals.
2. Do not reseed treated spots for at least two weeks after treatment. Bent grass, clovers and fescues may be injured in treated spots. Flowers, shrubs and vegetable crops should be protected from spray drift. Do not store near seeds, fertilizers, insecticides or fungicides. Do not use New Farmingdale Aim & Spray Weed Killer for other purposes. If taken internally, induce vomiting and call physician at once.
