COVERS 1500 SQ. FT. AT RECOMMENDED DILUTION

Mfg. for:

FARMINGDALE GARDEN LABS., INC.
136 Verdi Street, Farmingdale, L. I., N.Y. 11735

U S D A Reg. No. 5605 113

NOTE: Keep children and pets off treated areas for 24
hours until the grass has completely dried.

FARMINGDALE CHINCH BUG LIQUID SPRAY is an
emulsifiable insecticide containing Aspon and Methoxychlor. It
may be applied effectively with the Farmingdale Lawn
Sprayer. Do not store diluted spray. Make new dilution
for each use.

DIRECTIONS:

LAWN CHINCH BUGS: 1 1/3 cupfuls (10 1/2 ounces)
in 15 gallons water to cover 500 sq.ft. area. For best
results, water lawn thoroughly before spraying. All
adult Chinch Bugs may not die until 3 to 5 days after
spraying.

**SOD WEBWORMS, ARMYWORMS, CUTWORMS AND
Certain Other LAWN PESTS:** Use same concentration
recommended for Chinch Bug Control.

MILLIPEDES: 1/3 pint (5 ozs.) in 15 gals. water per
500 sq.ft.

HOW TO APPLY: Place required amount of FARMING-
DALE Chinch Bug Liquid Spray for 500 sq.ft. (20' x 25')
in the FARMINGDALE Lawn Sprayer jar. Fill remainder
of jar with water. Turn on hose and apply evenly
to 500 sq.ft. of lawn. Cover the area in 2 directions to
insure complete coverage. Direct the spray downwards
for maximum penetration into the grass. FARMINGDALE
CHINCH BUG LIQUID SPRAY applied as above usually
results in lawns free from Chinch Bug damage for
several weeks. In some instances, the lawn may not
be troubled again for months. Spray again as soon as
Chinch Bug damage is noticed. For those who would
rather follow a preventative spray program, apply
FARMINGDALE Chinch Bug Liquid Spray every 2 months,
starting in early spring.

CHINCH BUG KILLER

**ALSO KILLS: Sod Webworms,
Armyworms, Cutworms.**
