DIRECTIONS

FOR THE CONTROL OF GARDEN INSECTS: For use on ~~roses, dahlias~~ and other ornamentals to kill Japanese beetles, aphids, exposed thrips and spider mites. Hold container at least 18" from foliage, spray lightly in one-second bursts spraying both top and underside of foliage. Properly treated foliage will be protected from many garden insects for about one week.

This spray may be used on such plants as African violets, asters, azaleas, begonias, camellias, carnations, chrysanthemums, dahlias, delphiniums, dogwood, English ivy, euonymus, fuchsia, geraniums, crassula, grape vine, Kentia palm, laurel, marigolds, rhododendrons, roses, rubber plants, snap dragons, stocks, Wandering Jew and zinnias.

As a fungicide, spray before infection occurs for the prevention of powdery mildew and black spot on roses. Spray at five to seven day intervals while danger of fungous infestation persists.

CAUTION: Harmful if swallowed or inhaled. Avoid breathing or contact with eyes or skin. Wash thoroughly after use. Avoid contamination of feed or foodstuffs.

Do not spray closer than 18 inches from plants. Do not use near fish bowls or aquaria.

WARNING: Contents under pressure. Do not store above 120°F. Do not puncture or burn container. Do not spray near open flame.
