Kills Wasps, Hornets and Yellow Jackets. This spray is fast acting when insects are hit directly. Allow about 24 hours for those insects which were not directly hit by spray to leave the area. If insects should return to the treated area, spray again. This container delivers a stream type spray, making it possible for the operator to stay back from the places sprayed.

This formulation utilizes pyrethrins, piperonyl butoxide and a carbamate type insecticide, a combination particularly effective on this class of insects.

DIRECTIONS

To operate remove protective cap and depress button, being sure to aim spray opening at the location to be sprayed. Direct spray at insects wherever possible, and under eaves, into nests, cracks, holes or crevices wherever insects are noticed. Spray for about 10 seconds or until surface is moist from insecticide. To prevent entrance of insects into the house spray around points where outside plumbing, faucets, enter the house and into any cracks or crevices in foundation as well as along sills and ledges.

CAUTION:

Harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing spray mist or contact with skin. Wash thoroughly after using. Avoid storage near food or feed. Do not spray on pets, humans or other animals. Contents under pressure. If sprayed on skin wash off immediately with soap and water.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator.
