* * Dri-Die R

DRIONE Reg. FMC Corporation

CAUTION KEEP OUT OF REACH OF CHILDREN

See rear panel for further precautions.

Net Weight

000

Distributed by:
FARMINGDALE GARDEN LABORATORIES, INC.

Remove cap, aim valve from about 12 inches from area to be sprayed, and depress button. Avoid heavy deposits on finished surfaces.

To control ANTS, COCKROACHES and SILVER-FISH apply a continuous visible film of Drione underneath and behind stoves, sinks and refrigerators. To control FLEAS in animal quarters treat surfaces, particularly bedding. Also treat around and behind molding, shelving, baseboards, pipe openings, cracks, crevices and other areas where these insects may hide. Treat ant trails and areas where they enter. A deposit of Drione, if undisturbed, will continue to kill cockroaches for a period of several weeks through dessicant action. Repeat application when effectiveness diminishes.

To control BED BUGS take bed apart and treat cracks, joints and interior of framework. Mattress should be treated especially tufts, folds and edges.

WARNING: Contents under pressure. Do not store above 120 F. Prolonged exposure to sunlight or other heat sources may cause bursting. Do not throw into fire or incinerate.

Avoid breathing of vapor. Avoid contact with skin. Do not spray on exposed foods. Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.
