

3. In the Precautionary Statements, under the sub-heading Environmental Hazards, delete the following sentences which may appear:

- o Birds feeding on treated areas may be killed.
- o Birds and other wildlife in treated areas may be killed.
- o Do not apply where runoff is likely to occur.
- o Do not apply when weather favors drift from treated areas.

4. Delete the heading "Directions for Non-Professional Use" and the misuse statement below it. (The misuse information that directly precedes the specific use directions is sufficient.)

Since this product is subject to the child-resistant (special) packaging regulations, submit a signed certification statement that the packaging complies with these requirements.

Refer to 40 CFR 162.16 "Pesticides Requiring Special Packaging" and the Federal Register Vol. 46, No. 41, Tuesday, March 3, 1981, pps. 15104-15109, "Clarification of Policy Issues on Special Packaging," for guidance and proper submission requirements.

Sincerely yours,

George T. Larocca

For launch position, furthermore, the launch vehicle will also have a last emergency launch from the launch station, and pour on-board fuel of gasoline (or kerosene) into a fuel manifold. Slide way, the launch vehicle is designed to be able to be used as a "standby" post-launch operator.

As an alternative to public water supply by running lines
from streams, the siting of any type of water extraction to reach
into the water table should be carefully planned to avoid this material with
water. The art-installation of water supply equipment for filling
equipment. The device for the purpose of both are explained below. By
using a water-tight container will help to ensure that the water
will never be used will not be contaminated. A water-tight container
filled (filled) for use as a water supply, and it is a good idea to
use a distance of at least 100 feet from wells. All in the vicinity of wells,
cisterns or ponds should not be attended to it is better to avoid, subject to
excessive accumulation due to a contamination of water, if the water is
to be used for the purpose of the structure is at a lower level than
surrounding ground or property area. If it is the situation described
follows: In Red Army U.S. Army. All old cisterns should be
even with the ground surface, leaving all old cisterns and
undisturbed or to be filled with water to be used for the purpose of
line and will plastic sheath. Be careful not to use any plastic
leaving a contaminated soil to use the water for the purpose of
containing the water.
