Monitor the water with a suitable test kit for available bromine, after each addition of Bromine Energizer, and more frequently if necessary to assure a bromine residual of 1 to 2 parts per million. Do not use pool if the residual is above this limit. Maintain the ph of the water between 7.4 and 7.8 on a daily basis. Your dealer can supply a suitable test kit. Use ph plus or ph minus as needed.

STORAGE & DISPOSAL

*Do not reuse empty container

*Rinse empty container thoroughly with water and discard it.

SPA CARE BROMINE ENERGIZER AND SHOCK TREATMENT by Farmingdale

EPA Est. No. 5605-NY2

EPA Reg. No. 5605-RII

AN OXIDIZING AGENT FOR USE WITH BROMINE SOURCE AS PART OF A TWO PRODUCT SYSTEM FOR DISINFECTION OF WATER IN SPAS, HOT TUBS, AND THERAPEUTIC POOLS AND FOR USE BY ITSELF FOR SHOCK TREATMENT OF WATER IN SPAS AND HOT TUBS.

ACTIVE INGREDIENT: *Potassium peroxymonosulfate.....42.8%
INERT INGREDIENTS.....57.2%
*equivalent 4.5% active oxygen 100.00%

DANGER: KEEP OUT OF REACH OF CHILDREN

PRACTICAL TREATMENT: (FIRST AID): If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately.

If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

Under FIFRA, Insecticide,
Fungicide, and Plant Nuisance Act
as amended, for the pesticide
EPA Reg. No.

Bromine Energizer is a dual-purpose non-chlorinating oxidizer for the release of available bromine from the bromide salts contained in Bromine Source, and for the shock treatment of spa and hot tub water. Bromine Energizer can be used in any spa or hot tub to destroy chloramines which may contribute to eye and skin irritation and to help control undesirable odors caused by chemicals.

Bromine Energizer is compatible with most chemicals which may be present in pool water such as sanitizers, acids, bases and algicides. It should never be mixed outside of the pool with any other product or chemical.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Bromine Energizer should be added initially when the spa/hot tub is being filled and then daily as a shock treatment and as an activator for the production of available bromine from the bromide salts in Bromine Source.

Initially, treat the water with Bromine Source and 3 Way Spa Care Concentrate according to directions of the labels.

Then add 8 ounces of Bromine Energizer per 500 gallons of water (227 G/2000L) to shock the spa/hot tub and to release available bromine.

HYPERODES WEEVIL (New York only): Apply 3 fl. oz. per 1,000 sq. ft. of grass. Water grass thoroughly after application. Treat problem areas in mid-April and again in mid-May.

FOREST INSECTS

PINE (Seed Orchards, Plantations, Forests)

Arkansas Sawfly (Loblolly Sawfly): Apply $\frac{1}{2}$ pt. per acre over the tree canopy. Application should be made at or near the completion of egg hatch. Aerial applications should be made with a minimum of 2 gals. of spray per acre, in swaths not more than 90 ft. wide. Repeat application as needed.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: May be fatal if swallowed. May be absorbed through skin. Do not breathe spray mist. Do not get in eyes, on skin, or on clothing. Wash thoroughly after handling. Avoid contamination of food. Do not use on humans or permit children to go onto sprayed grass until spray has completely dried. Keep out of reach of domestic animals. Do not contaminate feed or use on household pets or livestock. Do not permit pets to go onto sprayed grass until spray has completely dried.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Birds feeding on treated areas may be killed. Keep out of lakes, streams, ponds, tidal marshes, and estuaries (except for effluence from treated water-cress beds). Do not apply to water that will be used for recreational purposes and human and livestock consumption. Shrimp and crab may be killed at application rates recommended on this label. Do not apply where fish, shrimp, crab, and other aquatic life are important resources. This product must not be used in areas where impact on threatened endangered species is likely. Contact your State Fish and Game Agency for information pertaining to areas having threatened endangered species. Apply this product only as specified on this label. This pesticide is highly toxic to bees exposed to direct treatment or to residues remaining on the treated area. Do not apply when bees are actively visiting the crop, cover crop, or weeds blooming in the treatment area. Applications should be timed to provide the maximum possible interval between treatment and the next period of bee activity.

PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill, or store near heat or open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Pesticide, spray mixture, or rinsate that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Reseal container and offer for reconditioning, or triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in approved landfill, or bury in a safe place. Consult federal, state, or local disposal authorities for approved alternative procedures.
