DIRECTIONS FOR USE

This is a ready to use solution and should be used as taken from the container without dilution of any kind.

TERMITE CONTROL

Spray or soak the soil, which has been removed from around the foundation of the building to a depth of 12 inches, using 2 gallons of ready-to-use solution per 5 cubic feet of soil or 2 gallons per 5 lineal feet of trench, or 5 square feet of ground surface. For buildings with deep foundations, a trench 30 inches in depth should be dug making certain, however, not to go below the top of the footing. In trenches of this depth the ready-to-use solution should be applied at a rate of one gallon per lineal foot of trench.

Replace dirt removed, spraying at 6 inch intervals as the earth is replaced. Decayed or termite attacked wooden sills should be replaced with new ones, treated as described below. Grass, plants, and other shrubbery within three feet of trench should be removed or protected by tar paper. Do not spray on plants.

WOOD PRESERVATION

This solution can be applied to lumber, poles, posts, and other wood products by a hot-cold bath process, by soaking, spraying, or brushing. The most effective treatment is obtained where deep penetration and high absorptions result. Soaking or a hot-cold bath process gives better results than does spraying or brushing and should be used where possible. Fence posts should be debarked and air seasoned until dry and then soaked 24 to 48 hours. Lumber for steps, sills etc., should be soaked for at least 12 hours. When the wood is not to be in contact with the ground, the ready-to-

use solution may be applied by brushing or swabbing. Wood which is to be in contact with the soil should receive two coats when applied by brush or spray. The joints should be thoroughly drenched.

A 5% solution of pentachlorophenol is a proven wood preservative and is especially recommended for the use of termite exterminators and others wishing to protect buildings from the ravages of these insects. When properly applied to wood, lasting protection from decay, termites, and powder-post beetles is given. It is also effective against mold.

WARNING

Do not breathe vapor or spray mist. Harmful if inhaled. Do not get in eyes, on skin or on clothing. Causes skin irritation. Wear gloves when handling freshly treated lumber. Harmful if swallowed or absorbed through skin. Wash thoroughly after handling. Inflammable. Keep away from fire. DO NOT spray on valuable plants or shrubs. DO NOT contaminate water by cleaning of equipment or disposal of wastes. DO NOT reuse empty drum. Return to drum conditioner or destroy by perforating or crushing and burying in a safe place. This product is toxic to fish and wildlife.
