DIRECTIONS FOR USE

TO KILL FLIES, MOSQUITOES AND GNATS

Close doors and windows directing the spray up toward the ceiling. The room should be filled with mist and remain closed for 10-15 minutes. Sweep up dead or stupefied insects and destroy them. Repeat treatment as often as necessary.

TO KILL ROACHES, WATER BUGS AND SILVERFISH

Spray liberally around refrigerators, sinks, all cabinets, around pantry shelves, into all cracks and crevices in moulding and woodwork, pipe openings in walls and floors or wherever these insects are likely to hide. Repeat treatment as often as necessary.

TO KILL ANTS

Use the spray so as to wet as many insects as possible, paying particular attention to nests and runways. Repeat treatment as often as necessary.

TO KILL BEDBUGS

Bedsteads should be sprayed thoroughly in all corners, cracks and crevices. Springs and mattresses should be sprayed thoroughly after the bed is dismantled, paying particular attention to cracks, crevices, tufts and seams on mattresses, wallpaper that is loose, loose moulding and any place where the bugs may hide. Repeat treatment as often as necessary.

TO KILL CLOTHES MOTHS AND CARPET BEETLES

Take special precautions to see that cracks in floors and openings below baseboards are thoroughly wetted with spray liquid. Wool lint and organic matter accumulating in these places will serve as breeding materials for such pests. Clothing to be stored should be cleaned and aired and sprayed carefully from a distance of one to two feet, taking care to see that seams and folds are wetted. Chests in which woolens are to be stored should be thoroughly sprayed before being filled with clothes. Closets should be sprayed liberally at least twice a month, directing the spray on the garments.

TO KILL FLEAS

Liberally spray all infested places rugs and under rugs, base ments, under porches, and wherever pet animals make their beds. Spray bedding of household pets. Do not spray animals directly. Repeat as required.
