5664-10

SIDE PANEL

Directions: For circulating in place cleaning of food processing equipment, use two ounces BACTACIDE per 10 gallons water.

For sanitizing after cleaning of utensils, use two ounces per 10 gallons water.

For spraying walls, floors, shelving, to control mold odors and growths of organisms, use one ounce per gallon of water.

For chlorine rinse in mechanical bottle washers, use 3/4 ounce per 10 gallons water (equivalent to 50 ppm) as a rinse after cleaning.

NOTE: TECH BACTACIDE is a sanitizing agent not a cleaner. All surfaces must be cleaned and rinsed prior to sanitizing.

Surfaces where concentrations of available chlorine over 200 parts per million are used (3 ounces or more per 10 gallons water) must be rinsed with potable water before coming in contact with food.
